Jen had a best friend whose name was also Jenn but with a double "n." They had beautiful brown eyes and blonde hair. But Jenn had long, wavy hair, while Jen had short, straight hair. They went to the same school and studied in the same class. They enjoyed playing sports together. They both excelled in their artistic talents, with a knack for drawing. One of them had a cat as a pet, while the other had a dog. They had different favorite colors, adding a unique touch to their friendship. They were responsible and often helped each other with homework. Coincidentally, their birthdays were in the same month. They loved their pets very much. Jenn took her cat wherever she went, while Jen's dog was her constant companion. However, tragedy struck when Jen forgot to close her dog's cage one day, and that was the last day she saw her pet. On the other hand, Jenn's cat brought joy to her life, and they played together every night.

J. Senter,S. John Abma,Kirk A. Johnson,Ross L. significantly less with the narrative text version of the material Although in general less informational content was imparted with the narrative text the study time necessary per unit improvement was significantly less with that version Records were kept of the number of wrong answer branches taken by the subjects receiving instruction via the branched programs Only about 6% of the total possible wrong branches were actually taken This suggests that branched programing may be wasteful by virtue of providing a quantity of material that is never studied Author **The Reading Teacher** ,1967
