Electric Vehicle Price

**Ibrahim Dinçer, Halil S. Hamut, Nader
Javani**

Electric Vehicle Price:

Learning Rates of Electric Vehicles Andreas Zerfaß, 2017-11-01 Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport related carbon dioxide CO₂ and air pollutant emissions However battery electric vehicles BEVs and plug in hybrid electric vehicles PHEVs have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges which still hampers the market potential of these vehicles Despite persisting shortfalls mechanisms such as technological learning and economics of scale promise to improve the techno economic performance of BEVs and PHEVs in the short to mid term Here the author seeks to obtain insight into the techno economic prospects of BEVs and PHEVs by i establishing experience curves and ii quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time series analysis The analysis captures the situation in Germany between 2010 and 2016 Thermal Management of Electric Vehicle Battery Systems Ibrahim Dinçer, Halil S. Hamut, Nader Javani, 2017-03-20 Thermal Management of Electric Vehicle Battery Systems provides a thorough examination of various conventional and cutting edge electric vehicle EV battery thermal management systems including phase change material that are currently used in the industry as well as being proposed for future EV batteries It covers how to select the right thermal management design configuration and parameters for the users battery chemistry applications and operating conditions and provides guidance on the setup instrumentation and operation of their thermal management systems TMS in the most efficient and effective manner This book provides the reader with the necessary information to develop a capable battery TMS that can keep the cells operating within the ideal operating temperature ranges and uniformities while minimizing the associated energy consumption cost and environmental impact The procedures used are explained step by step and generic and widely used parameters are utilized as much as possible to enable the reader to incorporate the conducted analyses to the systems they are working on Also included are comprehensive thermodynamic modelling and analyses of TMSs as well as databanks of component costs and environmental impacts which can be useful for providing new ideas on improving vehicle designs Key features Discusses traditional and cutting edge technologies as well as research directions Covers thermal management systems and their selection for different vehicles and applications Includes case studies and practical examples from the industry Covers thermodynamic analyses and assessment methods including those based on energy and exergy as well as exergoeconomic exergoenvironmental and enviroeconomic techniques Accompanied by a website hosting codes models and economic and environmental databases as well as various related information Thermal Management of Electric Vehicle Battery Systems is a unique book on electric vehicle thermal management systems for researchers and practitioners in industry and is also a suitable textbook for senior level undergraduate and graduate courses **The Bhutan Electric Vehicle Initiative** Da Zhu, Dominic Pasquale Patella, Roland Steinmetz, Pajnapa Peamsilpakulchorn, 2016-04-06 As the

country that inspires the world with gross national happiness development philosophy Bhutan is striving to pursue its economic growth while committing to its core values of inclusive and green development Even with robust economic growth rates Bhutan s dependence on imports and hydropower revenues drives the country to search for self reliant option to fuel the economy while further decarbonizing the economy Electric vehicle is being explored as one of the key policies to introduce green mobility reduce fossil fuel imports and put the country firmly on a green growth path Globally electric vehicles market and technology are still in the nascent stage but are developing rapidly The automotive industry has adopted electrification as a pillar of future drive train technology EV uptake is expected to increase significantly with ongoing improvements in technology and resulting cost decreases in the global market This report aims to help Bhutan think through various technical and policy issues of introducing electric vehicles in its own context It analyses a variety of factors that will impact adoption of electric vehicles from technical market and financial feasibility to consumer awareness and stakeholders capacity It also addresses several policy questions which are at the heart of public debate such as affordability of the government to undertake the program economic costs and benefits distributional impact fiscal and macroeconomic implications Drawing from vast international experiences the report examines in great technical details how global cutting edge technology like electric vehicles could be pursued in the context of developing economies with different socio economic characteristics and constraints compared to advanced economies It will help readers better grasp the technical financial economic and social challenges as well as opportunities in initiating electric vehicles program and provide practical recommendations that will be useful for policy makers in designing their own EV initiative

Overcoming Barriers to Electric-Vehicle Deployment National Research Council,Transportation Research Board,Division on Engineering and Physical Sciences,Board on Energy and Environmental Systems,Committee on Overcoming Barriers to Electric-Vehicle Deployment,2013-06-18 The electric vehicle offers many promises increasing U S energy security by reducing petroleum dependence contributing to climate change initiatives by decreasing greenhouse gas GHG emissions stimulating long term economic growth through the development of new technologies and industries and improving public health by improving local air quality There are however substantial technical social and economic barriers to widespread adoption of electric vehicles including vehicle cost small driving range long charging times and the need for a charging infrastructure In addition people are unfamiliar with electric vehicles are uncertain about their costs and benefits and have diverse needs that current electric vehicles might not meet Although a person might derive some personal benefits from ownership the costs of achieving the social benefits such as reduced GHG emissions are borne largely by the people who purchase the vehicles Given the recognized barriers to electric vehicle adoption Congress asked the Department of Energy DOE to commission a study by the National Academies to address market barriers that are slowing the purchase of electric vehicles and hindering the deployment of supporting infrastructure As a result of the request the National Research Council NRC a part of the

National Academies appointed the Committee on Overcoming Barriers to Electric Vehicle Deployment This committee documented their findings in two reports a short interim report focused on near term options and a final comprehensive report Overcoming Barriers to Electric Vehicle Deployment fulfills the request for the short interim report that addresses specifically the following issues infrastructure needs for electric vehicles barriers to deploying the infrastructure and possible roles of the federal government in overcoming the barriers This report also includes an initial discussion of the pros and cons of the possible roles This interim report does not address the committee s full statement of task and does not offer any recommendations because the committee is still in its early stages of data gathering The committee will continue to gather and review information and conduct analyses through late spring 2014 and will issue its final report in late summer 2014 Overcoming Barriers to Electric Vehicle Deployment focuses on the light duty vehicle sector in the United States and restricts its discussion of electric vehicles to plug in electric vehicles PEVs which include battery electric vehicles BEVs and plug in hybrid electric vehicles PHEVs The common feature of these vehicles is that their batteries are charged by being plugged into the electric grid BEVs differ from PHEVs because they operate solely on electricity stored in a battery that is there is no other power source PHEVs have internal combustion engines that can supplement the electric power train Although this report considers PEVs generally the committee recognizes that there are fundamental differences between PHEVs and BEVs
