Kim Saxton, Michael Cloran, 2019-03-05 I have read dozens of books on starting companies but this is the first that accurately captures why startups fail and provides a tool for entrepreneurs and investors to measure and manage these sources of failure Michael Hatfield Co Founder Cerent Calix Cienna and Carium What makes a startup successful This book from award winning business school professors and a tech serial entrepreneur tells what makes startups successful Instead of telling startups what to do like most startup books they share what startups should avoid Along the way they share small business startup success stories gleaned from the How Built This Podcast and their firsthand experiences These stories of startup success are contrasted with stories of startup failure from startup graveyards and most notably the Titanic Like many of today's startups the Titanic hoped to disrupt the transportation industry of its time It fell short to a disastrous outcome from the same sources that prevent startup success today Get a startup game plan This startup book uses the Titanic and a sailing metaphor to provide a startup roadmap template It shows what makes startups successfully navigate through challenges in startup investing founding and hiring with a game plan to get through the Human Ocean It offers a startup guide to customer success in working through the Marketing Ocean It even highlights what startups need to invest in to get through the Technical and Strategy Oceans Its Iceberg Index gives entrepreneurs startups and small businesses a way to track their progress on the startup roadmap template It also helps investors assess what startups to invest in Many entrepreneurs assume that the Titanic was sunk by a single iceberg The Titanic Effect shows that like many startups it's not a single misstep but a series of mistakes that keep a startup from being successful This combination of missteps is called the Titanic Effect Who can benefit from this startup roadmap Entrepreneurs in the early stages of building a startup They will learn what makes a startup successful They will

develop a to do list of decisions to make and actions to take Small business owners will also identify key next steps to building their startup game plan Investors can identify what to avoid in startup investments and what startups to invest in Students will learn how to evaluate the success potential of a startup and will read small business and startup success stories These three co authors have witnessed firsthand what leads to startup success They have made it their mission to help entrepreneurs startup founders and startup investors succeed Drs Todd and M Kim Saxton bring more than two decades of academic and professional experience in business strategy entrepreneurship marketing and angel investing Serial tech entrepreneur Michael Cloran adds his two decades of experiences in launching his own startups as well as building software products for other startups In addition the co authors serve on various boards of entrepreneurial ventures and startup advisory associations They have shared their expertise from the stage to dozens of audiences including students entrepreneurship and professional development associations academic societies and global companies like Roche Diagnostics and Pfizer Pharmaceuticals *Getting Multi-Channel Distribution Right* Kusum L. Engineering Conference, 1970 Global Warning Steven B. Frank, 2023-03-21 A group of 12 year old friends concerned about climate change proposes a new way to save the earth amending the U S Constitution Their project propels these activists on an amazing journey across America and all the way to Norway with plenty of outside the box hijinks and civil disobedience as they work to save the planet and their futures on it For sixth grader Sam Warren and his friends Catalina Alistair Jaesang and Zoe the effects of climate change are too pressing to ignore Adults don t seem to be up to the challenge

of taking action to make real change but kids know it's their futures on the line. If their parents, teachers, and government officials won't step up well, then they will. And these young people will stop at nothing to save the planet and their futures on it. With a little help from a retired kids rights lawyer and a grandma who knows how to march, they are ready to think big. Constitutional amendment, big. But can a bunch of 12 year olds really draft an amendment that protects the planet, get it to pass in Congress, and change enough hearts and minds across the country to get it ratified before the clock runs out? Steven B. Frank crafts another funny and fast paced story of heightened reality, wish fulfillment, loaded with the witty patter of smart kids in this book that reads like Aaron Sorkin for middle grade and plumbs the complexities of the Constitution and the critical turning point of global climate change. **BM/E**, 1987 **Minnesota Law Review**, 2016 *Open Source Leadership: Reinventing Management When There's No More Business as Usual* Rajeev Peshawaria, 2017-10-27. From taxi rides, hotel stays, car driving to communicating and paying everything we knew as normal has changed beyond recognition. To lead effectively in today's brave new world, you have to question EVERYTHING. For the first time in human history, knowledge is free and almost every boundary to communication has been lifted. This open source world has permanently altered the business landscape. And you can count on the fact that the pace of change will only accelerate. Yet companies still rely on management tools and practices that were at best mildly effective in their heyday. In *Open Source Leadership*, Rajeev Peshawaria reveals the vision, insight, and practices he has used to help some of today's largest and most influential organizations meet the open source world head on. It all starts with asking the right questions: What's the most effective leadership style in a world of 24/7 connectivity? How has the very concept of leadership changed in the open source era? How do you inspire and reward performance in the gig economy? How do you measure engagement and effectively address the gaps? How can you lead innovation quickly and continuously? Peshawaria reveals the answers to these questions, and they will surprise you. Based on his company's groundbreaking research spanning 28 countries, he concludes that traditional industrial age thinking needs a massive upgrade to successfully navigating the brave new world of business. *Open Source Leadership* rewrites the rules of management, giving you a unique look at the most common misperceptions, illusions, and downright wrong information you've been getting about what works and what doesn't. It provides a new counterintuitive model for seizing competitive edge in any industry. Among other issues, the book argues convincingly that positive autocracy must replace democratic leadership; talent and innovation are abundant, not scarce; early identification of high potentials is counterproductive; and setting employees free to do as little as they want will increase productivity.
