Read the short passage and answer the questions

The Sick Lion

A Lion had come to the end of his days and lay sick unto death at the mouth of his cave, gasping for breath. The animals, his subjects, came round him and drew nearer as he grew more and more helpless. When they saw him on the point of death they thought to themselves: "Now is the time to pay off old grudges." So the Boar came up and drove at him with his tusks; then a Bull gored him with his horns; still, the Lion lay helpless before them: so the Ass, feeling quite safe from danger, came up, and turning his tail to the Lion kicked up his heels into his face. "This is a double death," growled the Lion.

Shanahan curates a lively tour of the history of reading instruction in the United States arguing that the most popular reading instruction method is failing students and suppressing their literacy achievement. He breaks down the reasons why teachers and researchers alike have favored this accepted wisdom known as instructional level theory in US schools over the past five decades and presents a compelling case for a new way forward that will bolster students' reading skills. Today it is not uncommon to find students in a fourth grade classroom reading books suitable for third, second or even first graders. Teachers suggest books to students at their deemed instructional levels but how these instructional levels are determined is suspect. With a comprehensive critical analysis of instructional level pedagogy, Shanahan exposes its shaky foundations and shows how faulty research findings have become so entrenched. He gathers an extensive body of research studies that overwhelmingly contradict the instructional level theory and offers an evidence-based consideration of how educators must instead use grade level reading to bring about maximum learning gains. This seminal book concludes with practical advice for implementing grade level reading instruction including detailed descriptions of the types of instruction and scaffolding needed to increase students' reading achievement from teaching decoding and challenging texts to scaffolding reading to maintaining motivation. Shanahan asserts that a better approach can ensure that all students have an opportunity to leave high school with reading abilities commensurate with their personal, social, civic and economic goals.

Alan Robinson, 1989 This book examines the methods, materials, outcomes and technologies of past literacy practice with special focus on the teaching of reading comprehension. The book presents a study of published texts on reading comprehension instruction in America in the preresearch period 1783-1910 as well as published research reports from 1910 through 1987. The book argues that many of the trends in comprehension instruction can be traced to developments in American psychology and looks at future directions for both the practitioner and the researcher. A review of all the studies focused on reading comprehension instruction discussed in the book and an alphabetical listing by author of each study are included in the appendixes. KEH
