The increase in competition among sellers producers and retailers has led to an adoption of different forms of vertical restrictions on internet platforms which have come under the scrutiny of antitrust authorities This thesis aims to analyze vertical restraints on internet platform markets based on the investigation of Amazon com Inc by the Bundeskartellamt for its use of a price parity clause This clause was introduced in Germany and in the United Kingdom in 2010 in the contract between Amazon and sellers using its platform and prohibited them from setting lower prices on other platforms including their own websites than the prices they set on Amazon
