Dulley, 1993 **Left to Their Own Devices** Julie M. Albright, 2019-04-16 A sociologist explores the many ways that digital natives interaction with technology has changed their relationship with people places jobs and other stabilizing structures and created a new way of life that is at odds with the American Dream of past generations Digital natives are hacking the American Dream Young people brought up with the Internet smartphones and social media are quickly rendering old habits values behaviors and norms a distant memory creating the greatest generation gap in history In this eye opening book digital sociologist Julie M Albright looks at the many ways in which younger people facilitated by technology are coming untethered from traditional

aspirations and ideals and asks What are the effects of being disconnected from traditional stabilizing social structures like churches marriage political parties and long term employment What does it mean to be human when one s ties to people places jobs and societal institutions are weakened or broken displaced by digital hyper connectivity Albright sees both positives and negatives On the one hand mobile connectivity has given digital nomads the unprecedented opportunity to work or live anywhere But new threats to well being are emerging including increased isolation anxiety and loneliness decreased physical exercise ephemeral relationships fragmented attention spans and detachment from the calm of nature In this time of rapid global technologically driven change this book offers fresh insights into the unintended societal and psychological implications of lives exclusively lived in a digital world

Leveraging Embedded Factors of Business Ecosystems. A Potential Driver for Business Model Innovations ,2021-05-20 Master s Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 00 Catholic University Eichst tt Ingolstadt language English abstract This thesis aims to identify business ecosystem s embedded factors as potential drivers for business model innovations and thus to contribute to an expansion of innovation opportunities In the context of the consideration of different ecosystem concepts first their characteristics and roles are presented to make a precise distinction related and traditional structures e g value network supply chain Innovation ecosystems business ecosystems and platform ecosystems are considered in this study and empirically examined employing a multiple case study To ensure the value of the study only companies that have implemented a business model innovation within one of the defined ecosystems were included Innovations within the value chain of a single company can no longer fully satisfy new and dynamic customer needs It is therefore appropriate to intensify the network of relationships outside the company This is remedied by the value contribution resulting from the companies ecosystems which is higher than that of individual companies However in the ecosystem s environment the success of a company is strongly dependent on the success of its diverse and changing collaborations with other companies of different sizes and types Due to the embedding in different ecosystems the understanding of a company as an independent strategic actor is no longer appropriate in every case The Bottom Line
