*Nontimber Forest Products in the United States* Eric T. Jones, Rebecca  
 Jean McLain, James F. Weigand, 2002 A quiet revolution is taking place in America's forests Once seen primarily as stands of  
 timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar  
 to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more  
 mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides  
 the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse  
 importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As  
 the first extensive national overview of NTFP policy and management specific to the United States it brings together  
 research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology  
 forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The  
 contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial  
 products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural  
 traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs  
 while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species  
 populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape  
 from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in  
 the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP

issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests     **The Electrical Journal** ,1954     **Race and Resettlement in Brazilian National Planning** John J.
