SignGram Blueprint Josep Quer, Carlo Cecchetto, Caterina Donati, Carlo Geraci, Meltem Kelepir, Roland Pfau, Markus Steinbach, 2017-11-20 We gratefully acknowledge the financial support of COST European Cooperation in Science and Technology funded by the Horizon 2020 Framework Programme of the European Union Current grammatical knowledge about particular sign languages is fragmentary and of varying reliability and it appears scattered in scientific publications where the description is often intertwined with the analysis In general comprehensive grammars are a rarity The SignGram Blueprint is an innovative tool for the grammar writer a full fledged guide to describing all components of the grammars of sign languages in a thorough and systematic way and with the highest scientific standards The work builds on the existing knowledge in Descriptive Linguistics but also on the insights from Theoretical Linguistics It consists of two main parts running in parallel the Checklist with all the grammatical features and phenomena the grammar writer can address and the accompanying Manual with the relevant background information definitions methodological caveats representative examples tests pointers to elicitation materials and bibliographical references The areas covered are Phonology Morphology Lexicon Syntax and Meaning The Manual is endowed with hyperlinks that connect information across the work and with a pop up glossary The SignGram Blueprint will be a landmark for the description of sign language grammars in terms of quality and quantity

Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 2. John D. Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip T. Loncke, 2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike
