Planet Earth The View From Space Frontiers Of Space Series:

Georeferencing Linda L. Hill, 2009 An introduction to the principles of unified georeferencing which uses placename and geospatial referencing interchangeably across all types of information storage and retrieval systems Georeferencing relating information to geographic location has been incorporated into today's information systems in various ways We use online services to map our route from one place to another science business and government increasingly use geographic information systems GIS to hold and analyze data Most georeferenced information searches using today's information systems are done by text query But text searches for placenames fall short when for example a place is known by several names or by none In addition text searches don't cover all sources of geographic data maps are traditionally accessed only through special indexes filing systems and agency contacts data from remote sensing images or aerial photography is indexed by geospatial location mathematical coordinates such as longitude and latitude In this book Linda Hill describes the advantages of integrating placename based and geospatial referencing introducing an approach to unified georeferencing that uses placename and geospatial referencing interchangeably across all types of information storage and retrieval systems After a brief overview of relevant material from cognitive psychology on how humans perceive and respond to geographic space Hill introduces the reader to basic information about geospatial information objects concepts of geospatial referencing the role of gazetteer data the ways in which geospatial referencing has been included in metadata structures and methods for the implementation of geographic information retrieval GIR Georeferencing will be a valuable reference for librarians archivists scientific data managers information managers designers of online services and any information professional who deals with place based information *The Story of Space Station Mir* David M. Harland, 2007-12-26 Details how a succession of Salyut space stations led to the development of Mir Depicts Mir's assembly piece by piece in space between 1982 and 1996 Describes how Mir became an international research laboratory Advises how Mir technology went on to form the core modules of the ISS The definitive account of Mir throughout its life through to de orbiting in March 2001 **The Publishers Weekly**, 1990 Be Prepared Robert E. Kirsch, Emily Ray, 2024-12-31 Doomsday prepping has gone mainstream Survivalists star in reality TV shows celebrities hawk emergency gear and ordinary people stockpile essentials in the hope that they can outlast a slew of threats real and imagined The ideology behind prepping however is no passing fad but a persistent feature of American life Be Prepared reveals the surprising ways prepping is woven into the fabric of American institutions and shows its significance for understanding the fault lines of liberal democracy Robert E Kirsch and Emily Ray trace the beliefs and practices that underlie survivalism from the rise of the Boy Scouts of America to Cold War fears of nuclear devastation through present day Silicon Valley dreams of space colonization They argue that prepping is rooted in long standing anxieties over industrialization urbanization and immigration and steeped in the histories of colonial expansion and militarization To grasp its political implications Kirsch and Ray develop the concept of bunkerization not simply building

physical bunkers but building a society symbolized by the bunker In such a society individual vigilance and survival become the organizing principles of everyday life People opt out of collective projects and retreat into personal responsibility for preparedness expressed through acts of consumption Shedding new light on the persistence of antidemocratic politics from white supremacy to neoliberalism Be Prepared also considers how to escape the solitary fate of life in the bunker and instead meet collective problems together
