Planet For The President:

A Planet for the President Alistair Beaton, 2018-02-22 This is a story written over a decade ago Before Fake News or Alternative Facts or even social media It told the story of a not too distant future which really was not too distant The President of the United States is facing a global catastrophe The environment is in meltdown People are dying Americans are dying Even he can't ignore it There's hardly a corner of the world that isn't in crisis And that's when he's persuaded of a truth his advisers hold to be self-evident That it's time to think the unthinkable The problem isn't power or politics or the planet or the President It's the People Hilarious and horrifying this enormously entertaining satire has never been more razor sharp revelatory or relevant What readers are saying about this hilarious critically acclaimed novel For anyone who likes laughs and thrills in one package and who's been following recent developments in the White House this is an absolute must Amazon Reviewer 5 stars This political and satirical novel manages to be both thrilling and funny And given its prescience scary too The characters the setting and the plot are fantastic and believable A real page turner Amazon Reviewer 5 stars A frighteningly plausible thriller which imagines what might happen if the White House were finally to believe that something had to be done about global warming clever funny and a really good read Amazon Reviewer 5 stars This thriller is packed with good jokes and tells a tale that is utterly credible Parts were jaw-droppingly frightening and I wished I could have put it down but the sharp humour and pacy plot made me keep reading It's a laugh and a chiller in one book Amazon Reviewer 5 stars

How to Access One of the Planet's Premier Economies, 1992 The Athenaeum, 1878 **Whatever Is, was** George A. Young, 1887

The three most commonly accepted theories which philosophers have adopted in order to solve the mysterious problem, the origin of the Universe, are: First, That it is Self-made Pantheism; Second, That it is Self-existent Atheism; Third, That it is Created by an external agency or Supreme Intelligence, Spiritualism. In our examination of these theories, we have not entered the sanctuary nor discussed any religious dogmas. We have taken the Mosaic account of Creation as we have the cosmogonies of Epicurus, Kant, Laplace, and others as their theories to account for the origin of the visible universe and endeavored to logically and philosophically analyze them in order to see which might be the most probable. We have more particularly examined the foundation on which rests the philosophy of Herbert Spencer. Also, the theories of Charles Darwin, and endeavored to see if the philosophical structures which they have built thereon can stand the test of a logical analysis. We have presented to our readers a new theory for the Origin or formation of the World and Species, and for this purpose have accepted the hypothesis: That first, before the worlds were formed, there existed a chaos, a mass of primordial matter termed Atoms. We have not inquired into the primal cause of these, but assisted by the science of molecular physics, have built up the structure of our theory and endeavored to show the secondary or natural cause of the origin of all forms, organic and inorganic. Also, of the continuing existence of all living things and species of things. We may be permitted to say: That this book will be best appreciated by those who have some knowledge of philosophic literature, but no previous reading is necessary to the
