Beyond the Neighborhood Unit Tridib Banerjee,William C. Baer,2013-04-29 Much of the research on which this book is based was funded almost a decade ago by separate grants from two different agencies of the U S Public Health Service of the then still consolidated Department of Health Education and Welfare The first grant was from the Bureau of Community Environmental Management Public Health Service Research Grant J RO J EM 0049 02 and the second from the Center for Studies of Metropolitan Problems of the National Institute of Mental Health Public Health Service Grant ROJ MH 24904 02 These separate grants were necessary because of budget cuts that truncated our original effort We were fortunate to receive subsequent assistance from NIMH to conclude the research as it is doubtful that a project of the scope and intent of our effort even as completed in abbreviated form will be funded in the 1980s The original intent of this project as formulated by our colleagues Ira Robinson and Alan Kreditor and as conceptualized earlier by their predecessors members of an advisory

committee of planners and social scientists appointed by the American Public Health Association APHA was to rewrite Planning the Neighborhood APHA's recommended standards for residential design. In particular, it was proposed that the new study take the point of view of the user in terms of residential standards. Hitherto, the private sector had dominated these considerations, i.e., the designer's predilections, the requirements of builders and material suppliers, and lenders' needs for mortgage security.
