Taylor, D. J. F. Brown, 1997 Viruses transmitted by nematodes are responsible for many economically important diseases of crops Thus when in the late 1950s this mode of disease propagation was demonstrated by proof of the transmission of grapevine fanleaf disease by *Xiphinema index* it marked the start of a significant and fruitful period of research Since that time however numerous reviews have been published on different aspects of nematode transmission of plant viruses and the nematode transmitted viruses themselves However until now there has been a lack of any source which draws all of this research together This book fills this need by providing a valuable overview of the last forty years of research into the transmission of viruses by nematodes as well as setting the agenda for future investigations This book is an important resource for all crop protectionists nematologists and plant virologists      **Biological Control of Plant-parasitic Nematodes, 2nd Edition** Graham R Stirling, 2014-05-14 Plant parasitic nematodes are one of multiple causes of soil related sub optimal crop performance This book integrates soil health and sustainable agriculture with nematode ecology and suppressive services provided by the soil food web to provide holistic solutions Biological control is an important component of all nematode management programmes and with a particular focus on integrated soil biology management this book describes tools available to farmers to enhance the activity of natural enemies and utilize soil biological processes to reduce losses from nematodes      *Plant and Nematode Interactions* Kenneth R. Barker, Gary A. Pederson, Gary L. Windham, 1998 This monograph explores nematode biology systematics and ecology and provides specific information on the most important crop nematode interactions Of the 27 chapters in this monograph the first 14 are discipline oriented while the remaining 13 chapters focus on the key parasitic nematode species associated with the major food feed and fiber crops      **Australian Journal of Experimental Agriculture** ,1996      Agrarforschung ,1995
