Plant Cold Hardiness Paul H. Li, E. Tapio Palva, 2012-12-06 th We compiled this volume mostly from presentations at the 6 International Plant Cold Hardiness Seminar PCHS after consulting with Professor Tony H H Chen Oregon State University USA Professor Pekka Heino University of Helsinki Finland th and Dr Gareth J Warren University of London Surrey UK The 6 International PCHS was held at the Uitas Congress Center Helsinki Finland from July 1 5 2001 There were 110 registered scientists at the seminar representing 20 countries Australia Belgium Canada Chile the Czech Republic Denmark Estonia Finland Germany Hungary Iceland Italy Japan Norway Poland Spain Sweden Taiwan United Kingdom and United States of America The information compiled represents the state of the art of research in plant cold hardiness in terms of gene regulation gene expression signal transduction the physiology of cold hardiness and ultimately the genetic engineering for cold tolerant plants The International PCHS was initiated in 1977 at the University of Minnesota St Paul Minnesota It has been traditionally held at 5 year intervals at various locations th Because of the rapid advances of research in plant cold hardiness attendees at the 6 meeting unanimously adopted a resolution to hold the seminar in 3 year intervals instead of 5 in the future Consequently the next seminar will be held in 2004 in Sapporo Japan and Professor Seizo Fujikawa from Hokkaido University will serve as the host

**Molecular Biology of Stress Tolerance in Plants** K.V. Madhava Rao,A.S. Raghavendra,K. Janardhan Reddy,2006-01-16

Increasing agricultural productivity to meet the demands of growing population is a challenging task Abiotic stresses are among the major limiting factors on agriculture The knowledge and research programmes on the physiology and molecular biology of stress tolerance are certainly helpful to counter act this negative effect to a great extent The present literature deals in detail mostly with plant responses to different abiotic stresses There have been extensive studies in the past few decades on the physiology and biochemistry of plant responses to abiotic stress conditions in the laboratory as well as in the field However the interest has shifted to molecular biology of stress tolerance modes of installing tolerance mechanisms in crop plants Microarray technology functional genomics development of high throughput proteomics would benefit and guide the physiologists molecular biologists and biotechnologists to enhance stress tolerance in plants We therefore felt very strongly that there is an immediate and urgent need for a textbook on this important topic This book would be an ideal source of scientific information to the postgraduate students research workers faculty and scientists involved in agriculture plant sciences molecular biology biochemistry biotechnology and related areas We would like to thank the authors for their interest and cooperation in this exciting venture We are grateful to Jacco Flipsen and Noeline Gibson of Springer for their continuous support and technical advice in bringing out the book K V Madhava Rao A S Raghavendra September 2005 K
