Beyond Postmodernism Klaus Stierstorfer, 2012-05-02 After the veritable hype concerning postmodernism in the 1980s and early 1990s when questions about when it began what it means and which texts it comprises were apt to trigger heated

discussions the excitement has notably cooled down at the turn of the century Voices are now beginning to be heard which seem to suggest a new episteme in the making which points beyond postmodernism while it remains at the same time very uncertain whether what appears as newness is not rather a return to traditional concepts theoretical premises and authorial practices Contributors to this volume propose to explore new openings and recent developments in anglophone literatures and cultural theories which engage with issues seen to be central in the construction of a postmodern paradigm but deal with them in ways that promise new openings or a new Zeitgeist

Big Picture Perspectives on Planetary Flourishing Nicholas Hedlund, Sean Esbjörn-Hargens, 2022-07-29 This book split across two volumes is a follow up and companion to Metatheory for the Twenty First Century Routledge 2016 All three of these volumes are the dialogical outcome of a multi year symposia series wherein critical realists and integral theorists deeply engaged each other and their distinct but complementary approaches to integrative metatheory Whereas Metatheory for the Twenty First Century is primarily theoretical in its focus Big Picture Perspectives for Planetary Flourishing Metatheory for the Anthropocene aims to more concretely and practically address the complex planetary crises of a new era that many scholars now refer to as the Anthropocene In this first of two new volumes participants of the symposia series articulate a variety of big picture perspectives and transformative interventions in the domains of society and economics social psychology and education Together these chapters demonstrate how integrative metatheory and its application can make powerful contributions to planetary flourishing in the Anthropocene With one of the defining characteristics of the Anthropocene being the sheer complexity and multi valent nature of our interconnected global challenges these volumes crucially present new forms of scholarship that can adequately weave together insights from multiple disciplines into new forms of metapraxis As such this book will be of interest to students scholars and practitioners in the areas of philosophy social theory critical realism integral studies metamodernism and current affairs generally

The Space that Separates: A Realist Theory of Art Nick Wilson, 2019-08-23 The Space that Separates A Realist Theory of Art radically challenges our assumptions about what art is what art does who is doing it and why it matters Rejecting the modernist and market driven misconception that art is only what artists do Wilson instead presents a realist case for living artfully Art is defined as the skilled practice of giving shareable form to our experiences of being in relation with the real that is to say the causally generative domain of the world that extends beyond our direct observation comprising relations structures mechanisms possibilities powers processes systems forces values ways of being In communicating such aesthetic experience we behold life s betweenness the space that separates so coming to know ourselves as connected Providing the first dedicated and comprehensive account of art and aesthetics from a critical realist perspective Aesthetic Critical Realism ACR Wilson argues for a profound paradigm shift in how we understand and care for culture in terms of our system s of value recognition Fortunately we have just the right tool to help us achieve this transformation and it s called art Offering novel explanatory accounts of art aesthetic experience value play culture creativity

artistic truth and beauty this book will appeal to a wide audience of students and scholars of art aesthetics human development philosophy and critical realism as well as cultural practitioners and policy makers *After International Relations* Heikki Patomäki, 2003-08-29 Includes cutting edge contemporary research Engages with the central debates in IR such as truth agent structure problem level of analysis problem emancipation and new methodological procedure etc Author is a highly regarded scholar who has published widely on IR and is an important voice Reveals how critical realism CR enables better research and ethnopolitical practices Plato's Logic Tommi Juhani Hanhijärvi, 2019-03-22 Plato uses a logic without defining or naming it somewhat as verbs are used in daily life without saying verbs or defining them Linguists may define them Similarly Plato's Logic identifies Plato's logic Plato does not He lives by it The logic in question is used to track down first causes These begin or end causal series of all four of Aristotle's types of cause Thus for instance God in the Laws is the first mover in a chain of movers so God is the first efficient cause The Republic's Form of the Good again is the highest authority or order and due to this it is the first formal cause The Symposium's Form of Beauty is the first final cause that is the ultimate reward The Phaedo's psyche is a first material cause being simple and therefore immortal This is not a logic in Aristotle's sense but luckily that is not the only sense there is Plato's logic is relational not Aristotelian This is because the causes are easiest to interpret as causal relations Then the causal relations form series and the series begin or end in Forms or Gods In this book's formal vocabulary Plato's logic is always of the form aRbRc zRz if the terminus is a God or aRbRc zRR if the terminus is a Form All of Plato's writing is not quite like this that is true But his wildest and most characteristic writings are He does admittedly write many other things as well But the core of his philosophy consists of his hyperbolic claims about the Forms and Gods and so they deserve to be in the limelight The general idea of this book is that Plato's idealistic demands make sense in relational idioms The idealism is not nonsensical or fallacious but rational Speculation is a duty not a joke or a sin Numerous recent scholars are attacked because they belittle it **The Best Books for Academic Libraries: Religion and philosophy**, 2002 **Reframing the Theory of the Sublime** Cliff McMahon, 2004 The discourse of the sublime in this study becomes positioned in new perspectives when an amalgamation is made between major classical theorists and contemporary theorists leading to something like an anatomy of the sublime presented here as a theory of modes This amalgamation blends the sublimicist concepts of Longinus Burke Kant Nietzsche Herbert Weiskel Paul Crowther Jean Francois Lyotard Frances Ferguson Slavoj Zizek Terry Eagleton Harold Bloom David Nye Jeremy Gilbert Rolfe Sartre and Jung The treatment of Sartre and Jung shows that they generated major changes in the thought climate which established new modes of sublime experience recognized in modern art This study seeks to elucidate not only the standard core concepts of the theorists but also to bring to new prominence certain neglected religious Offering important innovative enlargements of the basic terminology for the discourse field this study opens new doors to the analysis of sublime experiences and sublime objects and thus new doors to the analysis of art works and artists programs as well as new
