Plausible Neural Networks For Biological Modelling:

Plausible Neural Networks for Biological Modelling H.A. Mastebroek, J.E. Vos, 2012-12-06 The expression Neural Networks refers traditionally to a class of mathematical algorithms that obtain their proper performance while they learn from examples or from experience As a consequence they are suitable for performing straightforward and relatively simple tasks like classification pattern recognition and prediction as well as more sophisticated tasks like the processing of temporal sequences and the context dependent processing of complex problems Also a wide variety of control tasks can be executed by them and the suggestion is relatively obvious that neural networks perform adequately in such cases because they are thought to mimic the biological nervous system which is also devoted to such tasks As we shall see this suggestion is false but does not do any harm as long as it is only the final performance of the algorithm which counts Neural networks are also used in the modelling of the functioning of sub systems in the biological nervous system It will be clear that in such cases it is certainly not irrelevant how similar their algorithm is to what is precisely going on in the nervous system Standard artificial neural networks are constructed from units roughly similar to neurons that transmit their activity similar to membrane potentials or to mean firing rates to other units via weight factors similar to synaptic coupling efficacies **The Handbook of Brain Theory and Neural Networks** Michael A. Arbib, 2003 This second edition presents the enormous progress made in recent years in the many subfields related to the two great questions how does the brain work and How can we build intelligent machines This second edition greatly increases the coverage of models of fundamental neurobiology cognitive neuroscience and neural network approaches to language Midwest *The 1996 IEEE International Conference on Neural Networks, June 3-6, 1996, Sheraton Washington Hotel, Washington, DC, USA.: Proceedings*, 1996 **Neural Network Models of the Brain Mechanisms of Bilateral Coordination** David Scott Farrar, 1999 **Proceedings of the ...
