engaging a trainee in a branching story in which the trainee must make a series of decisions that ultimately affect how the story plays out. The consequences and feedback are predicated not just on the alternative chosen but on the information sources used to make the decision. Thus emphasis is placed on the student's ability to collect and use information. SimFX consists of two components: the Player presents a scenario to the trainee and the Author allows training developers to create story-based scenarios or deliberate practice exercises. SimFX is a low-cost, easy-to-use training tool that has been favorably received by potential users in the Army training community.
