Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and

other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed. The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications. This is followed by a critical look at proposals for more far-reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism. The book concludes with a diagnosis of the global situation among the competing digital empires: the United States, the European Union, and China, and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future.

**Natural Language Processing in Action, Second Edition** Hobson Lane, Maria Dyshel, 2025-02-25

Develop your NLP skills from scratch with an open source toolbox of Python packages: Transformers, Hugging Face vector databases, and your own Large Language Models. *Natural Language Processing in Action, Second Edition* has helped thousands of data scientists build machines that understand human language. In this new and revised edition, you'll discover state-of-the-art Natural Language Processing (NLP) models like BERT and HuggingFace transformers, popular open source frameworks for chatbots, and more. You'll create NLP tools that can detect fake news, filter spam, deliver exceptional search results, and even build truthfulness and reasoning into Large Language Models (LLMs). In *Natural Language Processing in Action, Second Edition*, you will learn how to process, analyze, understand, and generate natural language text. Build production-quality NLP pipelines with spaCy. Build neural networks for NLP using PyTorch. BERT and GPT transformers for English composition, writing code, and even organizing your thoughts. Create chatbots and other conversational AI agents. In this new and revised edition, you'll discover state-of-the-art NLP models like BERT and HuggingFace transformers, popular open source frameworks for chatbots, and more. Plus, you'll discover vital skills and techniques for optimizing LLMs, including conversational design and automating the trial and error of LLM interactions for effective and accurate results.

About the technology: From nearly human chatbots to ultra-personalized business reports to AI-generated email, news stories, and novels, natural language processing (NLP) has never been more powerful.
