about his past and uncovers information on the world's first moon shot in 1851. As more and more secrets crumble and more new mysteries rise to take their place. *Planetary* Warren Ellis, 2004. This collection of Earth-shattering adventures from *Windstorm* stars a team of super-powered archaeologists who have uncovered evidence of super-human activity that spans the centuries. The team includes the ancient and incredibly powerful Elijah Snow, hot-tempered Jakita Wagner, and the seemingly insane Drummer as they deal with the abrupt appearance of a new mountain range in America and the shocking truth behind the near-destruction of the planet by the gods which happened in 1950.

Interplanetary Dust Eberhard Grün, Bo A.S. Gustafson, Stan. Dermott, Hugo Fechtig, 2012-12-06. Conceived more than six years ago, this book took much effort to develop and several updates in parts of the book became necessary because significant advances in the field of Interplanetary Dust had occurred. Now at the beginning of the new millennium, this book provides up-to-date coverage of all major aspects of dust in the Solar System. The volume is conceived as a source book for researchers in the field as well as a graduate-level textbook. In order to achieve the highest standard, the individual chapters are written by experts in the field, preserving the somewhat different style and language of the sub-topic. The book follows the comprehensive review of the Cosmic Dust field assembled by Tony McDonnell more than 20 years ago. That book covered dust in its various physical appearances as the common theme, but it described phenomena that appeared rather unrelated. The topics ranged from zodiacal light over lunar craters to dust particles collected in the atmosphere, from interstellar dust to comets and from dust dynamics to laboratory simulation of dusty phenomena.

Gears Vincenzo Vullo, 2020-02-14. This book provides a compact history of gears by summarizing the main stages of their development and the corresponding gradual acquisition of engineering expertise from antiquity to the Renaissance and the twentieth century. This brief history makes no claim to be exhaustive since the topic is so extensive, complex, and fascinating that it deserves an entire encyclopedia. Despite its brevity, the book debunks a number of popular misconceptions such as the belief that the first literary description of a gear was supplied by Aristotle. It disproves not only this myth but also other peremptory statements and/or axiomatic assumptions that have no basis in written documents, archaeological findings, or other factual evidence. The book is chiefly intended for students and lecturers, historians of science, and scientists and all those who want to learn about the genesis and evolution of this topic.

The History of the Study of Landforms or the Development of Geomorphology, Volume 5. T.P. Burt, A.S. Goudie, H.A. Viles, 2022-10-20. Co-published with British Society for Geomorphology. This volume is the fifth in the definitive series *The History of the Study of Landforms or the Development of Geomorphology*. Volume 1 (1964) dealt with contributions to the field up to 1890. Volume 2 (1973) with the concepts and contributions of William Morris Davis. Volume 3 (1991) covered historical and regional themes during the classic period of geomorphology (1890-1950). Volume 4 (2008) concentrated on studies of geomorphological

processes and Quaternary geomorphology between 1890 and 1965 by the end of this period process based studies had become dominant Volume 5 builds on this platform covering in detail the revolutionary changes in approach that characterized the study of geomorphology in the second half of the twentieth century It is divided into three sections the first deals with changes in approach and method the second with changes in ideas and the broader scientific context within which geomorphology is studied and the final section details advances in research on processes and landforms The volume s objective is to describe and analyse many of the developments that provide a foundation for the rich and varied subject matter of twenty first century geomorphology
