Planets and Planetarians Stanley L. Jaki, 1978 *Physik und Physikotheologie des jungen Kant* Hans-Joachim Waschkies, 1987-01-01 Keine ausführliche Beschreibung für Physik und Physikotheologie des jungen Kant verfügbar *Life on Other Worlds* Steven J. Dick, 2001-03-19 The recent discoveries of extrasolar planets and possible microfossils in Martian meteorite ALH 84001 are only the latest developments in a debate that spans millennia and that has been especially heated in the twentieth century From the furore over Percival Lowell's claim of canals on Mars at the beginning of the century to the biological experiments of the Viking spacecraft the controversial Mars rock and the sophisticated Search for Extraterrestrial Intelligence SETI at its end otherworldly life has often titillated and occasionally consumed science and the public So too have crucially related areas such as the search for planetary systems the quest for an explanation of UFOs and inquiries into the origin of life The theme has been elaborated in science fiction from H G Wells to Arthur C Clarke and resulted in some of the most popular films of all time including ET Aliens Independence Day and Contact Life on Other Worlds details in a readable and non technical manner the history of the twentieth century extraterrestrial life debate one of the pervasive themes of our century **The Extraterrestrial Life Debate, 1750-1900** Michael J. Crowe, 2012-05-04 Detailed scholarly study examines the ideas that developed between 1750 and 1900 regarding the existence of intelligent extraterrestrial life including those of Kant Herschel Voltaire Lowell many others 16 illustrations **Cosmology and the Scientific Self in the Nineteenth Century** Howard Carlton, 2022-08-03 This book argues that while the historiography of the development of scientific ideas has for some time acknowledged the important influences of socio cultural and material contexts the significant impact of traumatic events life threatening illnesses and other psychotropic stimuli on the development of scientific thought may not have been fully recognised Howard Carlton examines the available primary sources which provide insight into the lives of a number of nineteenth century astronomers theologians and physicists to study the complex interactions within their biocultural brain body systems which drove parallel changes of perspective in theology metaphysics and cosmology In doing so he also explores three topics of great scientific interest during this period the question of the possible existence of life on other planets the deployment of the nebular hypothesis as a theory of cosmogony and the religiously charged debates about the ages of the earth and sun From this body of evidence we gain a greater understanding of the underlying phenomena which actuated intellectual developments in the past and which are still relevant to today's knowledge making processes **The History of Geophysics and Meteorology** Stephen G. Brush, Helmut Erich Landsberg, 1985 From Influence to Inhabitation James E. Christie, 2019-10-02 This book describes how and why the early modern period witnessed the marginalisation of astrology in Western natural philosophy and the re adoption of the cosmological view of the existence of a plurality of worlds in the universe allowing the possibility of extraterrestrial life Founded in the mid 1990s the discipline of astrobiology combines the search for extraterrestrial life with the study of

terrestrial biology especially its origins its evolution and its presence in extreme environments This book offers a history of astrobiology s attempts to understand the nature of life in a larger cosmological context Specifically it describes the shift of early modern cosmology from a paradigm of celestial influence to one of celestial inhabitation Although these trends are regarded as consequences of Copernican cosmology and hallmarks of a modern world view they are usually addressed separately in the historical literature Unlike others this book takes a broad approach that examines the relationship of the two From Influence to Inhabitation will benefit both historians of astrology and historians of the extraterrestrial life debate an audience which includes researchers and advanced students studying the history and philosophy of astrobiology It will also appeal to historians of natural philosophy science astronomy and theology in the early modern period **Grosse**
