**Planning Based on Decision Theory** Giacomo Della Riccia, Rudolf Kruse, Didier Dubois, Hans-J. Lenz, 2014-05-04  
Planning of actions based on decision theory is a hot topic for many disciplines. Seemingly unlimited computing power, networking, integration and collaboration have meanwhile attracted the attention of fields like Machine Learning, Operations Research, Management Science and Computer Science. Software agents of e-commerce, mediators of Information Retrieval Systems and Database based Information Systems are typical new application areas. Until now, planning methods were successfully applied in production, logistics, marketing, finance management and used in robots, software agents etc. It is the special feature of the book that planning is embedded into decision theory and this will give the interested reader new perspectives to follow up.

**Cognitive Carpentry** John L. Pollock, 1995  
A sequel to the author's *How to Build a Person*, this work builds upon that theoretical groundwork for the implementation of rationality through artificial intelligence. It argues that progress in AI has stalled because of its creators' reliance upon unformulated intuitions about rationality. Instead, the author bases the OSCAR architecture upon an explicit philosophical theory of rationality encompassing principles of practical cognition, epistemic cognition and defeasible reasoning. One of the results is the first automated defeasible reasoner capable of reasoning in a rich logical environment.
