Falling From Grace J. S. Bothwell, 2008 This original study examines how members of the English medieval nobility and their families fell usually dramatically and often violently from positions of power in the period 1075-1455 It also considers what those who survived this fall did while out of favor and what some families did to attempt to revive their fortunes For those noble dynasties that managed to survive such downturns there was usually an attempt to return to position if not power though the road was never easy and this book argues increasingly involved sustained efforts by wives mothers and daughters Based on extensive research in chronicle administrative artistic and other interdisciplinary sources *Falling from Grace* spans almost four centuries from the Earls Revolt of 1075 to the beginning of the Wars of the Roses and will be of considerable interest to both academic and general audiences

Geography Is Destiny Ian Morris, 2022-06-07 In the wake of Brexit Ian Morris chronicles the ten thousand year history of Britain's relationship to Europe as it has changed in the context of a globalizing world When Britain voted to leave the European Union in 2016 the 48 percent who wanted to stay and the 52 percent who wanted to go each accused the other of stupidity fraud and treason In reality the Brexit debate merely reran a script written ten thousand years earlier when the rising seas physically separated the British Isles from the European continent Ever since geography has been destiny yet it is humans who get to decide what that destiny means Ian Morris the critically acclaimed author of *Why the West Rules for Now* describes how technology and organization have steadily enlarged Britain's arena and how its people have tried to turn this to their advantage For the first seventy five hundred years the British were never more than bit players at the western edge of a European stage struggling to find a role among bigger richer and more sophisticated continental rivals By 1500 CE however new kinds of ships and governments had turned the European stage into an Atlantic one with the English Channel now functioning as a barrier England transformed the British Isles into a United Kingdom that created a worldwide empire Since 1900 thanks to rapid globalization Britain has been overshadowed by American European and increasingly Chinese actors In trying to find its place in a global economy Britain has been looking in all the wrong places The ten thousand year story bracingly chronicled by *Geography Is Destiny* shows that the great question for the current century is not what to do about Brussels it's what to do about Beijing

Writing to the King David Matthews, 2010-04-01 In the century before Chaucer a new language of political critique emerged In political verse of the period composed in Anglo Latin Anglo Norman and Middle English poets write as if addressing the king himself drawing on their sense of the rights granted by Magna Carta These apparent appeals to the sovereign increase with the development of parliament in the late thirteenth century and the emergence of the common petition and become prominent in an increasingly sophisticated literature during the political crises of the early fourteenth century However very little of this writing was truly directed to the king As David Matthews shows in this book the form of address was a rhetorical stance

revealing much about the position from which writers were composing the audiences they wished to reach and their construction of political and national subjects

Bannockburn Michael Brown, 2008 The Battle of Bannockburn was a key confrontation in the Anglo Scottish wars of the 14th century This introduction places the battle in its wider political and military contexts and describes its importance not just to Scotland but to the rest of the British Isles *Allgemeine Weltgeschichte* Georg Weber, 1872
