## **Plasmalemma And Tonoplast Their Functions In The Plant Cell:**

Plasmalemma and Tonoplast Dieter Marmé, Erasmo Marrè, Rainer Hertel, 1982      **Plasmalemma and Tonoplast Oxidoreduction at the Plasma Membranerelation to Growth and Transport** Frederick L. Crane, D. James Morre, Hans E. Low, 1991-04-15 The concept of general oxidoreductase function at the plasma level is new Oxidoreduction at the Plasma Membrane Relation to Growth and Transport provides the first truly comprehensive coverage of the oxidoreduction reactions in plasma membranes and the role that can now be attributed to these enzymes in controlling growth and other cell functions in plants and animals The book describes the nature and orientation of oxidoreductases in plasma membranes the stimulation of cell growth by oxidants reacting with transplasma membrane electron transport changes in enzymes in tumor cells and the basis of the growth effects and oxidoreductase stimulation of membrane transport in relation to known second messenger functions such as cellular pH changes calcium transport protein phosphorylation and oxidation levels of pyridine nucleotides The book then examines the significance of these enzymes in cell culture tumor growth nerve transmission ion transport and membrane potential The book also presents a new approach to understanding the action of antitumor drugs and herbicides Biochemists biologists oncologists cancer researchers physiologists and endocrinologists will find this an indispensable reference source as they conduct studies in this exciting new area      **Hormones, Receptors and Cellular Interactions in Plants** C. M. Chadwick, D. R. Garrod, 1986-02-06 This book takes a broad look at the current status of research on receptors in higher and lower plants It starts with a discussion of some hormone receptors auxins ethylene and gibberellin in higher plants and then considers the role of cyclic AMP and its receptors in the slime mould Dictyostelium      Plasmalemma and Tonoplast, 1982

**Progress in Botany / Fortschritte der Botanik** Heinz Ellenberg, Karl Esser, Klaus Kubitzki, Eberhard Schnepf, Hubert Ziegler, 2012-12-06      Weed Physiology Stephen O. Duke, 2018-01-18 Volume 2 deals with the mechanisms of herbicide action and of resistance and tolerance to herbicides The first five chapters of this volume cover the effects of herbicides and adjuvants on the physiology of plants Professor Black's chapter begins by covering the effects of herbicides on photosynthesis including photosynthetic assimilation of nitrogen sulfur and phosphorus This is followed by Dr Morelands chapter on herbicide interactions with plant respiration The third chapter by Professor Bartels deals with the effects of herbicides on chloroplast and cellular development with emphasis on correlating physiological information with ultrasound effects      *Plasmalemma and Tonoplast: Their Functions in the Plant Cell* D. Marmé, R. Hertel, 1982      *Physiologische Schlüsselp Prozesse in Pflanze und Insekt* Pierre Benveniste, 1985      **Structure and Function of Roots** F. Baluska, Milada Ciamporová, Otilia Gasparíková, Peter W. Barlow, 2013-11-11 In 1971 the late Dr J Kolek of the Institute of Botany Bratislava organized the first International Symposium devoted exclusively to plant roots At that time perhaps only a few of the participants gathered together in Tatranska Lomnica sensed that a new era of root meetings was beginning Nevertheless it is

now clear that Dr Kolek's action undertaken with his characteristic enormous enthusiasm was rather pioneering for it started a series of similar meetings. Moreover, what was rather exceptional at the time was the fact that the meeting was devoted to the functioning of just a single organ, the root. One possible reason for the unexpected success of the original, perhaps naive idea of a Root Symposium might lie with the fact that plant roots have always been extremely popular as experimental material for cytologists, biochemists and physiologists wishing to probe processes as diverse as cell division and solute transport. Of course, the connection of roots with the rest of the plant is not forgotten either. This wide variety of disciplines is now coupled with the development of increasingly sophisticated experimental techniques to study some of these old problems. These factors undoubtedly contribute to the necessity of continuing the tradition of the root symposia. The common theme of root function gives, in addition, a certain unity to all these diverse activities.

Current Topics in Cellular Regulation Bernard L. Horecker, Earl R. Stadtman, 2014-06-28. Current Topics in Cellular Regulation Volume 23 is a collection of papers that discusses pyruvate carboxylase, the regulation of carbohydrate metabolism and the plasma membrane ATPase of fungi or plants. Other papers deal with adrenergic control of phosphofructokinase, protein phosphatase as well as the regulation of polypeptide precursors of mature mitochondrial proteins. One paper explains the three-dimensional structure of pyruvate carboxylase and its reaction mechanism. Electron microscopic analyses show that four monomers of pyruvate carboxylases isolated from vertebrate sources form a tight tetrahedron-like structure. Another paper describes the regulation of fructose 2,6-bisphosphate concentration in the liver and of the enzymes that are responsible for its metabolism and the mechanism involved in fructose, particularly in the regulation of 6-phosphofructo 1-kinase and fructose 1,6-bisphosphatase activity. The paper also explains the role of this effector in the regulation of hepatic carbohydrate metabolism. One paper deals with the different levels of biological organization: whole cells, isolated plasma membranes and purified enzyme that characterizes the plasma membrane ATPase of fungi and plants as a novel type of proton pump. The collection can prove useful for biologists, microbiologists, students and professors of biology and biophysics.
