Plato As Author:

The Kierkegaardian Author Joseph Westfall, 2009-02-26 This study engages in a detailed examination of Kierkegaard's works of literary and dramatic criticism including those works directed at interpreting Kierkegaard's own authorship with a specific concern for both what Kierkegaard and Kierkegaard's anonyms and pseudonyms write about the nature and practice of authorship as well as how the Kierkegaardian authors practice authorship themselves Moving through five chapters each devoted to one or more works of Kierkegaard's criticism the study develops a new approach to reading Kierkegaard a new Kierkegaardian hermeneutic that begins always with the character of the author This new approach avoids the challenges of critics of biographical criticism such as Roland Barthes Michel Foucault and Jacques Derrida by positing the author always as a work of fiction him or herself the creation of an unknown and ever anonymous author of the author

Observational Astronomy: a Book for Beginners Arthur Mee, 1893 **The Laurel and the Olive** Benjamin Acosta-Hughes, 2024-06-04 A central much studied feature of the poetry of 3rd cent BCE Alexandria is the artistic treatment of the cultural past the reception of earlier Greek poetry and artwork in the artistic creations of a new Greco Egyptian world deracinated both geographically and temporally from the heroes and models of Archaic and Classical Greece Benjamin Acosta Hughes has devoted a 30 year professional scholarly career to the study of this reception one of both imitation and variation which took place concurrently with the massive collection and categorization of earlier Greek

literature in the work of the scholars gathered under royal patronage at the Ptolemaic court in Alexandria a truly revolutionary new effort of cultural memorialization The poets of this period among them Callimachus Theocritus Apollonius and Posidippus vied in their efforts to compose works that at once celebrated their poetic heritage and at the same time marked their own poetry as original artistic creation and as critical commentary upon their earlier models This collection will be of interest not only for readers of Archaic and Hellenistic poetry but also for readers interested in the later reception of the Alexandrians at Rome

The Friendly Orange Glow Brian Dear, 2017-11-14 At a time when Steve Jobs was only a teenager and Mark Zuckerberg wasn't even born a group of visionary engineers and designers some of them only high school students in the late 1960s and 1970s created a computer system called PLATO which was light years ahead in experimenting with how people would learn engage communicate and play through connected computers Not only did PLATO engineers make significant hardware breakthroughs with plasma displays and touch screens but PLATO programmers also came up with a long list of software innovations chat rooms instant messaging message boards screen savers multiplayer games online newspapers interactive fiction and emoticons Together the PLATO community pioneered what we now collectively engage in as cyberculture They were among the first to identify and also realize the potential and scope of the social interconnectivity of computers well before the creation of the internet PLATO was the foundational model for every online community that was to follow in its footsteps The Friendly Orange Glow is the first history to recount in fascinating detail the remarkable accomplishments and inspiring personal stories of the PLATO community The addictive nature of PLATO both ruined many a college career and launched pathbreaking multimillion dollar software products Its development impact and eventual disappearance provides an instructive case study of technological innovation and disruption project management and missed opportunities Above all The Friendly Orange Glow at last reveals new perspectives on the origins of social computing and our internet infatuated world
