## **Play School Split Out And About:**

**Education and Me** S N Kumar, Education and me is a book which is written to bring about various facets of teaching and learning in the field of education. Primarily, the book has showcased what education means to me as critical thinking, writing, and a future career. The importance of education to students, teachers, and society as a whole is highlighted. It also raises a question as to whether education occurs in educational institutions only. The book also brings out that education in this sense would certainly include all efforts for inculcation of values, attitudes, and skills that the society desires to be imparted to children. In contrast to this broader notion, education occurring in institutions like schools and colleges is an act of consciously imparting values, knowledge, and skills in accordance with the requirements in a formal situation. The book also deals with the present education system, challenges faced by the education system, the condition of government schools, the future of education, and remedial measures to improve this educational system. This book also compares the educational system of India, China, UK, and USA. The need for innovative education, use of social media, and how learners can prepare themselves for future competition. The role of parents, teachers, and society in bringing out a child to face the world is also discussed in detail. The need for teacher training and preparation of teachers for teaching jobs is also showcased here. The book also brings out the need for moral education, guidance, and counseling in schools. Parents are looking for alternate schooling, which is also a new issue, has been highlighted. So the book is complete knowledge of education. It will be really beneficial to teachers, students, parents, and Principals of the educational institutions.

**Families, Pre-School Sport, and Physical Activity** Georgia Allen-Baker, Philippa Velija, 2025-08-08. Bringing together international authors writing from a social science perspective on babies, toddlers, and pre-school sport and physical activity, this book explores the social and cultural context in which children under five take part in sport and physical activity. The book provides a wider understanding of how under-five sport and physical activity (PA) can be understood and how parents' decisions are shaped by economic, cultural, and changing family work and social settings. As early childhood is increasingly understood as a time when children are impacted by inequality, poverty, and unequal access to opportunities, the text considers how access to enrichment activities may exacerbate inequalities in a post-pandemic society and during a cost of living crisis. The book is organized into three parts covering theoretical concepts of childhood and parenting and then presents parent perspectives and inclusion in pre-school sport and PA from a UK and international perspective respectively. This is an excellent introduction to the key trends and patterns in under-fives sport and PA for undergraduate and postgraduate students studying sport studies, sport management, sport science, sociology, and cultural studies. It helps students to consider how these patterns can be understood through a socio-cultural lens on equality, families, childhood, and parenting. It is also a valuable resource for academics and researchers in sport sociology and social sciences more broadly.

*Local Literacies in Early Childhood* Helen Victoria Smith, 2021-08-20. This book contributes to current debates about the importance of early literacy and the different ways that literacy resources offer support to parents.

with young children It sheds light on the impact of policy discourse and austerity measures on community resources designed to support children s early literacy learning Based on an ethnographic study carried out in a small town in the East Midlands UK the book shows how government policy is enacted in four local resources Sure Start children s centres pre schools a public library and privately run parent and child early education classes It reveals how inequalities and contradictions exist in different forms of community literacy provision which can explain some of the educational differences evident when children start school With a particular focus on mothers the book reveals how parents are supported differently depending on where they go and how they are viewed by the professionals they encounter The book contributes to the current literature around literacy in early childhood and combines a unique case study with theoretical concepts to offer a new way of thinking about early intervention parental engagement and school readiness Local Literacies in Early Childhood will be highly relevant reading for researchers academics and post graduate students in the field of early childhood education and literacy education It will also be of interest to policymakers early childhood professionals literacy advisors and librarians from different local national and international contexts wishing to support parents and children more equitably so that learning opportunities can be maximised and educational inequalities tackled
