**Environmental Regulation** Jon Foreman, 2017-11-12 This book provides a critical examination of contemporary approaches to environmental regulation in the UK and the European Union. It also explores how regulation has evolved in response to a number of factors including industrial development and improved scientific knowledge while considering the radical next steps that need to be taken in response to existing challenges. *Developments in Environmental Regulation* draws its focus on the effects of risk based approaches to the environmental regulation of business and industry including its impact on sustainable economic growth. The book also considers the challenges and potential opportunities that surround the UK's withdrawal or Brexit from the European Union. This edited collection has been written by a group of highly experienced regulatory specialists whose insightful perspectives on key areas of environmental regulation are situated at the core of this work. This book will appeal to students and academics, policy makers and environmental practitioners interested in understanding how environmental policy and regulation is applied and how it can be adapted to its political context.

**Waste Treatment and Disposal** Paul T. Williams, 2013-04-30 Following on from the successful first edition of *Waste Treatment Disposal*, this second edition has been completely updated and provides comprehensive coverage of waste process engineering and disposal methodologies. Concentrating on the range of technologies available for household and commercial waste, it also presents readers with relevant legislative background material as boxed features. NEW to this edition: Increased coverage of re-use and recycling; Updating of the usage of different waste treatment technologies; Increased coverage of new and emerging technologies for waste treatment and disposal; A broader global perspective with a focus on comparative international material on waste treatment uptake and waste management policies. **Seventeenth Report** Great Britain. Royal Commission on Environmental Pollution, John Houghton, 1993-01-01 34 million tonnes of municipal waste, 30-40 million tonnes of sewage sludge and possibly 6 million tonnes of chemical and clinical wastes are produced in the UK each year. This comprehensive report deals with incineration and its role in relation to this waste. From their study, the Commission has come up with 35 recommendations which include a national strategy for waste management that a levy be applied to all waste deposited in landfill sites that government should give targets to waste disposal authorities for the recovery of energy from municipal waste and that waste disposal facilities should wherever possible be on sites which allow wastes to be moved by rail or water transport rather than road. **Report** Great Britain. Royal Commission on Environmental Pollution, 2004.

**Landfill Waste Pollution and Control** K Westlake, 1995 This text addresses a worldwide problem of pollution hazards with an understanding of scientific and technical control of the landfill method of waste disposal. European and North American practices and controls are contrasted so identifying world-wide landfill controls and techniques. *Transport and the Environment* Great Britain. Royal Commission on Environmental Pollution, 1994. **The Global Environment** Dag Brune, Deborah V. Chapman, Michael Gwynne, Jozef M. Pacyna, 1997-07-14 These two volumes provide an authoritative overview of all the major environmental topics. Focusing on the current state of the art as well as the examination of future

perspectives The first volume spotlights the basic sciences and environmental exploitation exploring issues such as global climates marine pollution tourism and the environment chemical time bombs and the ozone layer The second volume is devoted to preventative strategies technology and management Recommended techniques for environmental monitoring waste management responses to oil spills ecological engineering are described as are environmental education and international law Volume 2 highlights strategies for solving man made environmental problems This reference is addressed to scientists and engineers in industry and in academia government planners and administrators political scientists lawyers and economists and promotes understanding between experts in various disciplines Journal of international law and practice ,1994 Official Journal of the European Communities ,1995 **Parliamentary Debates (Hansard)**. Great Britain. Parliament. House of Commons,1995 **Environmental Pollution Royal Commission: Royal Commission on Environmental Pollution Seventeenth Report. Incineration of Waste** ,1992 *OECD Environmental Performance Reviews* ,1994 HMSO Monthly Catalogue Great Britain. Her Majesty's Stationery Office,1993 *Demographic Change and the Environment* Great Britain. Royal Commission on Environmental Pollution,2011 In *Demographic Change And The Environment* the Royal Commission on Environmental Pollution analyses demographic trends in the UK and their potential environmental impacts Apart from total numbers of people it is also important to consider other demographic trends such as changes in the age structure growth in the number of households and where people live and work These demographic trends have environmental impacts through the demand for water The generation of waste air quality greenhouse gas emissions and changes in biodiversity Government has not given adequate attention To The implications of demographic change For The environment Unless the issues are addressed urgently there is substantial risk of costly problems emerging in the next 40 years More important than total population size are factors such as household size The age structure of the population and where people live Public policy can have very limited direct effects on these demographic factors with the exception of where people live Patterns of consumption have a greater impact on the environment than demographic factors There is far greater scope to influence consumption patterns and their impact A step change is needed in efforts to increase resource use efficiency The demand for new housing and related development as a result of demographic change will increasingly come up against environmental constraints in some parts of the country The constraints can be managed but at a significant economic and environmental cost The government should compare these costs with the cost of enhanced incentives to encourage development in areas facing fewer constraints *Journal of Planning and Environment Law* ,1998 Integrated Pollution Management Frank S. Feates,Rod Barratt,1995 This is a practical introduction to modern techniques of pollution control providing a layperson s guide to UK and European environmental legislation The book focuses on the industrial plant demonstrating that pollution is prevented through minimizing waste and a full chapter is devoted to discussing means of keeping the public fully informed
