*The Acquisition of Nokia's Handset Business by Microsoft. Surrounding circumstances, perspectives, and post-acquisition analysis*, 2019-05-02 Seminar paper from the year 2018 in the subject Business economics Business Management Corporate Governance grade 1.3 language English abstract The aim of this report is to provide an in depth analysis of Microsoft's acquisition of Nokia's devices and services business for EUR 3.79 billion the surrounding circumstances and the proceedings. In order to evaluate whether a merger or an acquisition can be considered successful a number of factors have to be taken into account ranging from financial improvements to business synergies the latter one to be fairly challenging in terms of a direct attribution of value creation. During 2011 Microsoft and Nokia entered into a partnership which resulted in the rollout of the Windows Phone. The consequence was a carve out and Nokia's disintegration of the smartphone market. This report will first give an overview of the sector in which the deal took place followed by an outline of other relevant M/A activities in the TMT industry during the same time horizon. Subsequently both the acquirer and the target company are introduced giving a historical overview an explanation of the business model an analysis of the key financials and information on previous M/A activities involved. Then the purpose of the deal is discussed elaborating the perspectives of both parties on the underlying strategic implications for the acquisition followed by impartial skepticism.
