Prevention Jean Drèze,Amartya Sen,1990 Part of a major report on world hunger instigated by the World Institute for Development Economics Research this volume deals with possible solutions to the problem of regular outbreaks of famine in various parts of the world Law and the Political Economy of Hunger Anna Chadwick,2019-01-31 This book is an inquiry into the role of law in the contemporary political economy of hunger In the work of many international institutions governments and NGOs law is represented as a solution to the persistence of hunger This presentation is evident in the efforts to realize a human right to adequate food as well as in the positioning of law in the form of regulation as a tool to protect society from unruly markets In this monograph Anna Chadwick draws on theoretical work from a range of disciplines to challenge accounts that portray law s role in the context of hunger as exclusively remedial The book takes as its starting point claims that financial traders caused the 2007 8 global food crisis by speculating in financial instruments linked to the prices of staple grains The introduction of new regulations to curb the excesses of the financial sector in order to protect the food insecure reinforces the dominant perception that law can solve the problem Chadwick investigates a number of different

legal regimes spanning public international law international economic law transnational governance private law and human rights law to gather evidence for a counterclaim law is part of the problem The character of the contemporary global food system a food system that is being progressively financialized owes everything to law If world hunger is to be eradicated Chadwick argues then greater attention needs to be paid to how different legal regimes operate to consistently privilege the interests of the wealthy few over the needs of poor and the hungry *The Political Economy of Hunger* Jean Drèze,Amartya Sen,1990 **The Political Economy of African Famine** R. E. Downs,Donna O. Kerner,Stephen P. Reyna,2019-07-19 Originally published in 1991 This volume explores the combination of political and economic forces that influence different levels of food supply The book begins with a discussion of famine theories ranging from cultural ecology to neo Marxism Following this survey is a series of essays by anthropologists geographers economists and development practitioners that explores the role of Western institutions in African famine analyzes famine in particular countries and documents the relationship between famine and gender This book takes an unusually broad look at famine by including analyses of countries where hunger has rarely been studied and by examining African famine from both African and Western perspectives Its concluding proposals for eradicating famine make innovative and provocative contributions to current global debates on food and nutrition *Hunger and Public Action* Jean Drèze,Amartya Sen,1990-06-28 This is an open access publication available online and distributed under the terms of the Creative Commons Attribution Non Commercial Share Alike 3 0 IGO licence CC BY NC ND 3 0 IGO It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations This study was well received and widely discussed when it appeared in hardback in 1990 It is devoted to analysis of the enduring problem of hunger in the modern world and of the role that public action can play in countering it The book is divided into four parts The first attempts to provide a coherent perspective on the complex nutritional economic social and political issues involved in the causation of hunger and deprivation The second deals with famine prevention paying special attention to Africa and India The third focuses on chronic undernourishment and related deprivations Parts two and three include a number of case studies of successful public action for the prevention of hunger and famines in various parts of the world The fourth part of the book draws together the main themes and concerns of the earlier chapters and provides an integrated view of the role of public action in eliminating hunger **The Political Economy of Hunger in Zimbabwe** Thomas D. Shopo,1985 **The Politics of Hunger** John W. Warnock,2019-07-19 Originally published in 1987 This important and provocative book explains the persistence of hunger poverty and the lack of balanced development in many countries and the central role of agriculture in economic development Most theories of agricultural development are based on the experiences of western Europe and the United States while the two models for successful late development have been Japan and the Soviet Union This book surveys the evolution of agriculture under colonialism in Latin America Africa and Asia and concludes that this long period distorted the development prospects for these areas and retarded the

production of food Under strong state capitalist governments a few underdeveloped countries have broken the colonial patterns of development However other post revolutionary societies are having far less success because of economic blockades and outside military intervention While the primary focus of the book is on the short run problems of inequality the author examines the long run ecological and resource constraints to a sustainable food system and raising the standard of living in the underdeveloped world
