DYK, 1962 Collection of Pamphlets on Child Study, Psychology and Education ,1890 Ecology, Acculturation and Psychological Adaptation R C Mishra, Durganand Sinha, John W Berry, 1996-08-05 This pioneering book applies the techniques of cross cultural research to a study of Indian society The authors study in detail the pattern of psychological adaptation of three different tribal groups in the Indian state of Bihar which reflect different ecological adaptations with resulting differences in settlement and occupation patterns A wide range of cognitive behaviours in relation to the ecological engagements of these tribes is examined and a comparative analysis of the lifestyles of the three groups their patterns of child socialization and their experiences of and attitudes towards Research Grants Index National Institutes of Health (U.S.). topics as emotion intelligence so called instincts dynamic needs personality traits and the like are included to provide background and review Recent developments in child psychology have called for the inclusion of topics which were not offered in the previous edition of this book Thus complete chapters have been devoted to psychosexual development school and the learning process and the characteristics of exceptional children Other chapters have been combined in such a way as to be more concise and selective in their presentation. The original chapters dealing with intelligence and the nature nurture issue as well as those devoted to the development of language and of understanding have been united in single chapters Throughout pertinent recent studies from social psychology and cultural anthropology have been related to the discussion Finally an attempt has been made in the present edition to avoid the growing practice of making texts in this field resemble reference works intensely packed with researches names facts and other data which although pleasing to the specialist are too encyclopedic to motivate or inform undergraduate students This is not to say that the facts findings and interpretations of child psychology and development have been neglected Rather the plan has been to present the literature in a flowing and easily interpreted account of its facts and findings together with interpretations and applications to the rearing of children For this reason there is a minimum of mention of the names of research workers and others in the presentation of topics and findings these names and their accompanying contributions having been reserved for inclusion in the appropriate footnotes which in every case appear on the page concerned without breaking the flow of discussion Preface PsycINFO Database Record c 2010 APA all rights reserved Psychological Differentiation.
