volume continues the tradition and covers five cancers breast prostate bladder lymphoma and ovarian the role of HIV and HTLV in cancer as well as some developmental pharmacology and behavioral issues This year we have particularly focused our attention on one of the most common although rarely addressed cancer accounting for more than 315 000 newly diagnosed cases and 41 000 cancer related deaths annually Landis SH et al 1999 prostate cancer Five chapters address some of the issues concerning this disease The chapter by Schroder describes the hopes and pitfalls of early detection of prostate cancer It reviews the literature on screening studies that have been performed both in the US and in Europe These studies suggest that cancer mortality could be reduced by screening for prostate cancer mostly through PSA testing However the effectiveness of early detection still needs to be definitely confirmed and ongoing randomized studies are described the results of which will probably help the medical community determine the worth of PSA based screening for prostate cancer On the same hand the paper from von Eschenbach is reviewing the clinical problems that are related this disease

Psychologie, Psychopathologie und Psychotherapie ,1989 **The (non)expression of Emotions in Health and Disease** A. J. J. M. Vingerhoets, Frans van Bussel, Jan Boelhouwer, 1997 The Non Expression of Emotions in Health Disease contains the texts of contributions to the international conference on the non expression of emotions in health and disease held at Tilburg University on August 28 30 1996 Emotions are important for people in daily life Their relevance is linked to their communicational aspects and their function to motivate fuel and guide our efforts to cope with the world around us But emotions can also seriously interfere with people s ability to function adequately and can thus impede adaptation In addition both quasi experimental and correlational studies have yielded support for the hypothesis that the nonexpression of emotions may be an important factor for health status However it is not entirely clear how the different constructs and findings obtained with different methodologies relate to one another Also little is known about possible aetiological factors associated with nonexpression Why are some individuals more expressive than others What are the basic functions of emotional expressiveness and why and how could nonexpressiveness be associated with poor health status Topics like alexi thymia emotions and disease and the clinical aspects are addressed in this publication Finally there are contributions focusing on adult crying The book is intended for both researchers and clinicians in the behavioral sciences and in medicine
