Public Education And Indoctrination

Charles J. Russo, E. Edmund Reutter

Public Education And Indoctrination:

Islamic Education and Indoctrination Charlene Tan, 2012-01-26 This book critically examines the concept of indoctrination within the Western liberal traditions and analyses case studies of indoctrination in some Muslim societies. It offers suggestions to counter religious indoctrination and highlights the key tensions, challenges, and prospects of Islamic education in a modern and multicultural world.

Tyranny Through Public Education - Revised Edition William F. Jr Cox, 2004-04 This book documents the inherently flawed nature of America's public school system as currently structured. Contemporary recommendations for correcting the system invariably treat symptoms rather than the inherent problem of government control over parental and religious rights. The book documents that education is a religious endeavor and that freedom of religion is guaranteed in the United States; parents have an inalienable right to raise their children free from government constraints on education; civil government is to protect and not deprive citizens of their inalienable rights; the educational history of our country affirms that education has always had a religious function; recent interpretations of the First and Fourteenth Amendments are both misguided and opposite from their original meanings; federal control of education and education taxation is outside the legitimate authority of the U.S. Constitution; and government control of education at federal, state, and local levels is inherently tyrannical. Addressed in separate chapters, the above-mentioned issues individually and collectively build a compelling case for the disestablishment of government control and the return of parental control to education. To quote James Madison: government should relate to education in the same way as it does to religion: not to intermeddle with it.

Teaching Without Indoctrination: Implications for Values Education Charlene Tan, 2008-01-01

This book presents a comprehensive, well-structured, and enlightening survey of the problem of indoctrination as manifested in scientific, moral, religious, and social fields within the context of an intellectual milieu that prides itself in being liberal and democratic. In the craft of intellectual midwifery, which she masters, Professor Tan has but one prescription: constant reflection, but not of the solipsistic or sterile kind. Rather, she advocates fearless questioning within the bounds of a community of learning, which is what schools should ideally be, wherein we all recognise ourselves to be at once students and teachers. Professor Alejo José G. Sison, Rafael Escobar, Chair of Professional Ethics, University of Navarra, Pamplona, Spain.

Education and Indoctrination Michio Nagai, 1976

The Philosophy of Indoctrination Chris Ranalli, 2024-12-16 This book develops and defends a novel social epistemological account of indoctrination. It answers important epistemological, ethical, and political questions about what indoctrination is, why it is epistemically harmful, how it can be practiced, and how we should talk about indoctrination. The author presents three views related to the epistemology of indoctrination. First, he argues that indoctrination is most fundamentally a structural epistemic phenomenon which results in closed-minded beliefs. The sources of indoctrination are diverse: institutional structures, technological systems, ideological frames, and individual actions. What unites them is that they lead to the systematic failure to consider seriously the relevant alternatives to what we

are taught whether by accident or by design Second he makes the case that indoctrination is always wrong because it disrespects agents in their capacity as epistemic agents even when it results in true belief Third and finally he contends that public indoctrination ascriptions are political propaganda they function to promote political agendas which can ironically breed the conditions for indoctrination rather than forestall it The Philosophy of Indoctrination is an essential resource for researchers and advanced students working in social and political epistemology ethics political philosophy philosophy of education and terrorism and radicalization studies

The Oxford Handbook of Propaganda Studies Jonathan Auerbach, Russ Castronovo, 2013-11-13 Derived from the word to propagate the idea and practice of propaganda concerns nothing less than the ways in which human beings communicate particularly with respect to the creation and widespread dissemination of attitudes images and beliefs Much larger than its pejorative connotations suggest propaganda can more neutrally be understood as a central means of organizing and shaping thought and perception a practice that has been a pervasive feature of the twentieth century and that touches on many fields It has been seen as both a positive and negative force although abuses under the Third Reich and during the Cold War have caused the term to stand in most recently as a synonym for untruth and brazen manipulation Propaganda analysis of the 1950s to 1989 too often took the form of empirical studies about the efficacy of specific methods with larger questions about the purposes and patterns of mass persuasion remaining unanswered In the present moment where globalization and transnationality are arguably as important as older nation forms when media enjoy near ubiquity throughout the globe when various fundamentalisms are ascendant and when debates rage about neoliberalism it is urgent that we have an up to date resource that considers propaganda as a force of culture writ large The handbook will include twenty two essays by leading scholars from a variety of disciplines divided into three sections In addition to dealing with the thorny question of definition the handbook will take up an expansive set of assumptions and a full range of approaches that move propaganda beyond political campaigns and warfare to examine a wide array of cultural contexts and practices

Indoctrination U. David Horowitz, 2007 In 2003 Horowitz began a campaign to promote intellectual diversity and a return to academic standards in American universities Here is a riveting account of the reaction to Horowitz's campaign by professor unions and academic associations whose leaderships have been taken over by the political left
