Polish Value Theory:

Lectures on Polish Value Theory Czesław Porębski, 2019-02-11 This book offers a synoptic introduction to an important chapter of Polish 20th century philosophy by introducing the studies of Kazimierz Twardowski Tadeusz Czeowski Tadeusz Kotarbiński Władysław Tatarkiewicz Roman Ingarden Henryk Elzenberg Maria Ossowska and Józef Maria Bocheński and how they contributed to value theory ethics and aesthetics These philosophers differed in their more definite interests methodological approaches and main results and yet their investigations share a number of characteristic features Questions of value considered as extremely vital are treated with care and precision In spite of the richness of their insights and an impressive number of detailed results these philosophers refrain from hasty conclusions trying here as elsewhere to conduct their studies in an intellectually and morally responsible way

Reviews in Number Theory 1973-83 Richard K. Guy, 1984 *The Far Reaches* Michael D Gubser, 2023-05-25 By restoring morality to phenomenology and phenomenology to East European politics Gubser has rewritten the intellectual history of the twentieth century Samuel Moyn author of *Liberalism Against Itself* When future historians chronicle the twentieth century they will see phenomenology as one of the preeminent social and ethical philosophies of its age The phenomenological movement not only produced systematic reflection on common moral concerns such as distinguishing right from wrong and explaining the status of values it also called on philosophy to renew European societies facing crisis an aim that inspired thinkers in interwar Europe as well as later communist bloc dissidents Despite this legacy phenomenology continues to be largely discounted as esoteric and solipsistic the last gasp of a Cartesian dream to base knowledge on the

isolated rational mind Intellectual histories tend to cite Husserl's epistemological influence on philosophies like existentialism and deconstruction without considering his social or ethical imprint And while a few recent scholars have begun to note phenomenology's wider ethical resonance especially in French social thought its image as stubbornly academic continues to hold sway The Far Reaches challenges that image by tracing the first history of phenomenological ethics and social thought in Central Europe from its founders Franz Brentano and Edmund Husserl through its reception in East Central Europe by dissident thinkers such as Jan Patočka Karol Wojtyła Pope John Paul II and Václav Havel In his fascinating and elegantly written book Michael Gubser leads us away from intellectual history's traditional stomping grounds in France Germany and the United States and focuses on the understudied Eastern bloc Edward Baring Modern Intellectual History

Darkly Peter McCormick, 2010 How are the numerous member states of the European Union today to reach proper consensus on an eventual common EU social model In this meditative and reflective philosophical literary and social inquiry first presented as invited lectures at the Institute for European Studies of the Jagiellonian University Peter McCormick highlights

the still largely overlooked conceptual and linguistic resources of the distinctive European high modernist poetry of suffering for freshly rearticulating some of the most basic moral and ethical values at the historical roots of European civilization Against contrasted readings of modernity in the works of both analytic and hermeneutic philosophers successive studies investigate the figures of moral discourse moral perception and both moral motivation and ethical emancipation in the poetry of the Nobel Laureats T S Eliot Paul Valéry and Eugenio Montale The result is the renewed availability of richly resourceful formulations of fundamental European values for stimulating the ongoing work of achieving appropriate political consensus for a future harmonized European Union social policy
