*Performing Self in Ethnographic Fieldwork* Marilena Papachristophorou, 2025-01-02 This provocative book presents a methodological proposal for teaching ethnographic fieldwork applying interdisciplinary tools inspired from performance theory acting experiential anthropology and existential psychotherapy At the same time it constitutes a theoretical and methodological trajectory mapping the history of ethnographic fieldwork through highly characteristic moments along with the author s own personal journey in the field in terms of a lifetime project Starting from the assumption that ethnographic fieldwork constitutes a

deeply human experience the book proposes a step further towards the performative dimension of an ethnographic condition inspired by the Stanislavski method which in practice complements performance theory issues it is argued that participant observation offers an intermediate identity for the ethnographer through a conscious management of the social role dictated by their research participants this ethnographic mediation of the Self may also have psychotherapeutic effects mainly through conscious management of self diversity and reflexivity in ethnographic writing Ethnographic fieldwork is thus highlighted as a performative stage and a field of deep transformations for the ethnographer s identity

**Emotions and Fieldwork** Sherryl Kleinman, Martha A. Copp, 1993 What is the place of emotions in fieldwork Do emotions hinder research or do they help the researcher to understand better those they are studying Qualitative researchers have mixed feelings about emotions and the effects on their research Consequently many fieldworkers allow themselves to have particular feelings such as closeness with participants and try to deny or get rid of emotions deemed inappropriate within the fieldwork community The significant costs associated with ignoring feelings are taken up in this volume as Kleinman and Copp explore links between emotions and analysis The authors examine how fieldworkers feelings about their professional identity their work and the people they study inform analyses The conclusion offers an extended example from one of the author s field studies to highlight how fieldworkers emotions can add power to qualitative analyses An appendix demonstrates how to weave emotions into fieldnotes and into preliminary analyses Of the many recent methodological contributions Sherryl Kleinman and Martha Copp s Emotions and Fieldwork offers a unique and important perspective one that should be taken seriously by quantitative and qualitative researchers alike No matter what variety of research one conducts Kleinman and Copp s methodological critique provides an important way of thinking about the research process Theory and Methods Kleinman and Copp move qualitative research into a new domain of discussion by focusing on the role of emotion in fieldwork Well written and tightly organized Emotions and Fieldwork is a groundbreaking contribution to the literature on ethnography and fieldwork New Ethnographies This is a valuable research monograph for practitioners and students of qualitative methods and stands in bold contrast to books that advocate leaving emotions at home when one goes to the field Kleinman and Copp understand the emotional complexities of fieldwork and the empowerment that may result from exploring feelings thoroughly Reading this book might ameliorate some of the culture shock that can occur for the novice who expects it all to work like following recipes in a cookbook Qualitative Sociology
