Psychology Of Religious Commitment And Development:

The Psychology of Religious Commitment and Development Leland F. Asa,1995-01-01 The Psychology of Religious Commitment and Development presents a survey of current literature pertaining to the development of religion in youth and its maintenance throughout adulthood and old age Asa presents material that is based on research rather than past theory and speculation Psychology, Religion, and Spirituality James M. Nelson,2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental und standings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical ba ground Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult *Handbook of Adolescent Psychology, Volume 1* Richard M. Lerner,Laurence Steinberg,2009-04-06 The study of and interest in adolescence in the field of psychology and related fields continues to grow necessitating an expanded revision of this seminal work This multidisciplinary handbook edited by the premier scholars in the field Richard Lerner and Laurence Steinberg and with contributions from the leading researchers reflects the latest empirical work and growth in the field Invitation to the Psychology of Religion Raymond F. Paloutzian,1983 **The Psychology of Religion** Bernard Spilka,Ralph W. Hood (Jr.),Richard L. Gorsuch,1985 Since its publication in 1897 Dracula has enthralled generations of readers with the alluring malevolence of its undead Count the most famous vampire in literature Though Bram Stoker did not invent vampires his novel helped catapult them to iconic stature spawning a genre of stories and movies that flourishes to this day A century of imitations has done nothing to diminish the fascination of Stoker s tale of a suave and chilling monster as he stalks his prey from a crumbling castle in Transylvania s Carpathian mountains to an insane asylum in England to the bedrooms of his swooning female victims A classic of Gothic horror Dracula remains an irresistible entertainment of undying appeal *The Oxford Handbook of Parenting and Moral Development* Deborah Laible,Gustavo Carlo,Laura M. Padilla-Walker,2019 The Oxford Handbook of Parenting and Moral Development provides a collection of state of the art theories and research on the role that parents play in moral development Contributors who are

leaders in their fields take a comprehensive yet nuanced approach to considering the complex links between parenting and moral development. The volume begins by providing an overview of traditional and contemporary perspectives on parenting and moral development, including perspectives related to parenting styles, domain theory, attachment theory, and evolutionary theory. In addition, there are several chapters that explore the genetic and biological influences related to parenting and moral development. The second section of the volume explores cultural and religious approaches to parenting and moral development and contributes examples of contemporary research with diverse populations such as Muslim cultures and US Latino. The last major section of the volume examines recent developments and approaches to parenting, including chapters on topics such as helicopter parenting, proactive parenting, parent-child conversations and disclosure, parental discipline, and other parenting practices designed to inhibit children's antisocial and aggressive behaviors. The volume draws together the most important work in the field; it is essential reading for anyone interested in parenting and moral development.

Handbook of Positive Psychology, Religion, and Spirituality Edward B. Davis, Everett L. Worthington Jr., Sarah A. Schnitker, 2022-11-17. This handbook aims to bridge the gap between the fields of positive psychology and the psychology of religion and spirituality. It is the authoritative guide to the intersections among religion, spirituality, and positive psychology and includes the following sections: 1. historical and theoretical considerations, 2. methodological considerations, 3. cultural considerations, 4. developmental considerations, 5. empirical research on happiness and well-being in relation to religion and spirituality, 6. empirical research on character strengths and virtues in relation to religion and spirituality, 7. clinical and applied considerations, and 8. field unification and advancement. Leading positive psychologists and psychologists of religion and spirituality have coauthored the chapters, drawing on expertise from their respective fields. The handbook is useful for social and clinical scientists, practitioners in helping professions, practitioners in religious and spiritual fields, and students of psychology and religion and spirituality. This is an open access book.

Handbook of Child Psychology and Developmental Science, Socioemotional Processes, 2015-03-31.

The essential reference for human development theory, updated and reconceptualized. The Handbook of Child Psychology and Developmental Science, a four-volume reference, is the field-defining work to which all others are compared. First published in 1946 and now in its Seventh Edition, the Handbook has long been considered the definitive guide to the field of developmental science. Volume 3, Social, Emotional, and Personality Development, presents up-to-date knowledge and theoretical understanding of these several facets of social, emotional, and personality processes. The volume emphasizes that any specific processes, functions, or behaviors discussed in the volume co-occur alongside and are inextricably affected by the dozens of other processes, functions,

or behaviors that are the focus of other researchers work As a result the volume underscores the importance of a focus on the whole developing child and his or her sociocultural and historical environment Understand the multiple processes that are interrelated in personality development Discover the individual cultural social and economic processes that contribute to the social emotional and personality development of individuals Learn about the several individual and contextual contributions to the development of such facets of the individual as morality spirituality or aggressive violent behavior Study the processes that contribute to the development of gender sexuality motivation and social engagement The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period There is a paradigm shift that involves increasingly greater understanding of how to describe explain and optimize the course of human life for diverse individuals living within diverse contexts This Handbook is the definitive reference for educators policy makers researchers students and practitioners in human development psychology sociology anthropology and neuroscience

The Religious Commitment Inventory-10 : Development, Refinement, and Validation of a Brief Scale for Research and Counseling, 2003 **The Psychology of Religious Belief** Laurence Binet Brown, 1987 This book is concerned with empirical studies of religious belief and the contexts within which they are to be understood It also examines classical views of religion its structures and parameters the readiness for religion and the reasons for accepting religious beliefs While some knowledge of psychology is assumed the book is designed to be more generally intelligible to the average reader

Religion, Personality, and Mental Health Laurence B. Brown, 2012-12-06 LAURENCE B BROWN Nearly all the papers in this collection were prepared initially by a group of psychologists interested in the social scientific study of religion They included some working with the mentally ill in medical religious or secular contexts as well as teachers and researchers in psychology or theology Their papers aim to test or to reflect on common prejudices about the links between mental health and religion especially when they are thought to be mediated by personality characteristics All the papers have been revised for this collection A clear consensus emerged that religion has many positive effects despite Wulff's 1991 p 307 unguarded assertion that without question the mentally disturbed are frequently attracted by religion Any assumption that religion is necessarily a danger to health or closely related to mental illness is not supported by the evidence from carefully controlled studies that follow a social science perspective Malony's paper page 16 in this collection therefore emphasizes that we must take account of the ways in which anyone's religion is integrated into their life the functions it serves for them and their acceptance by other members of the religious and other groups to which they belong

The Psychology of Religion Laurence Binet Brown, 1988 **The Psychology Of Religion** Bernard Spilka, 2019-05-20 Theory in the psychology of religion is in a state of rapid development and the present volume demonstrates how various positions in this field may be translated into original

foundational work that will in turn encourage exploration in many directions A number of new contributions are collected with previously published pieces to illustrate the *A New Approach to Religious Orientation* Stephen W. Krauss, Ralph W. Hood Jr., 2013-08-10 The Commitment Reflectivity Circumplex CRC model of religious orientation is introduced and the results from a series of model testing experiments are reviewed The CRC model was developed through a series of studies in the United States and Romania and was created in an effort to reduce the theoretical and empirical difficulties associated with the traditional Allportian religious orientation models and measures Toward this end the difficulties associated with the Allportian religious orientation models are reviewed along with how the CRC model attempts to address them Next the CRC model is introduced and a list of its predictions are given and compared to those of the Allportian models The results of 10 model testing studies using multidimensional scaling are then reviewed In these studies the CRC model which posits that all religious orientation can be located along dimensions of commitment importance and reflectivity complexity is found to be more accurate than the Allportian models in both the U S and Romania Based on these studies the meaning and interpretation of the Allportian measures are reviewed and new interpretations are suggested Lastly the relationships between religious orientation mental health personality ideology and prejudice are explored In every area the CRC model and the measures based on it show superior predictive abilities to traditional approaches in both the United States and Romania
