Derailment bei Führungskräften Rabea Christiane Haag, 2016-01-01 In dieser Arbeit wird das Phänomen des Derailments von Führungskräften welches als das anscheinend plötzliche Scheitern einhergehend mit dem Verlust des Arbeitsplatzes oder der Führungsverantwortung definiert ist untersucht In bisherigen Studien zeigte sich dass es eine Vielzahl potenzieller Risikofaktoren für das Derailment also die Entgleisung einer Führungskraft geben kann Diese Risiken können intrapersoneller Natur sein wie Persönlichkeitsstörungen kognitive Fähigkeiten oder Motivstruktur interpersonell bedingt sein wie Führungsstil oder soziale Fertigkeiten aber auch situativ begründet sein wie beispielsweise die Unternehmenskultur Bislang gibt es kein eindeutig definiertes Risikoprofil Es zeigte sich jedoch dass insbesondere extreme Ausprägungen einzelner Merkmale dysfunktional zu sein scheinen Besonders häufig scheinen eine mangelnde Anpassungsfähigkeit an Veränderungen einzuweisen

gender Führungsstil sowie Persönlichkeitszuge Ursache für das Scheitern von Führungskräften zu sein. In dieser Arbeit wurden episodische Interviews mit fünf engleistenden Führungskräften geführt, um die Innenperspektive eines Derailments beleuchten zu können. Es zeigte sich, dass alle interviewten Manager in einem Umfeld tätig waren, welches von Veränderungen geprägt war. Darüber hinaus haben alle eine oder mehrere Krisen erlebt und hatten den Eindruck, dass ihr Verhalten durch ihren Arbeitgeber nicht ausreichend gewürdigt wurde. Man kann davon ausgehen, dass neben zwei Personen, bei denen Hinweise auf eine Persönlichkeitsstörung vorliegen, die mangelnde Anpassungsfähigkeit an Veränderungen sowie ein wenig transformationaler Führungsstil die Hauptursachen für das Scheitern der Interviewpartner dieser Studie waren. Es wird ein Verlaufsmodell von Derailment vorgeschlagen, welches zwischen einem internalen sowie einem externalen Derailment differenziert. Bei einem internalen Derailment implodieren die Betroffenen und zeigen beispielsweise depressive oder Burnout Symptome. Bei einem externalen Derailment explodieren die jeweiligen Führungskräfte, was sich in Auseinandersetzungen mit dem Arbeitgeber oder der Schikane von Mitarbeitern äußern kann.

Work and Quality of Life
 Nora P. Reilly, M. Joseph Sirgy, C. Allen Gorman, 2012-05-31
 Employees have personal responsibilities as well as responsibilities to their employers. They also have rights. In order to maintain their well-being, employees need opportunities to resolve conflicting obligations. Employees are often torn between the ethical obligations to fulfill both their work and non-work roles to respect and be respected by their employers and coworkers to be responsible to the organization while the organization is reciprocally responsible to them to be afforded some degree of autonomy at work while attending to collaborative goals to work within a climate of mutual employee management trust and to voice opinions about work policies, processes, and conditions without fear of retribution. Humanistic organizations can recognize conflicts created by the work environment and provide opportunities to resolve or minimize them. This handbook empirically documents the dilemmas that result from responsibility-based conflicts. The book is organized by sources of dilemmas that fall into three major categories: individual, organizational, internal policies and procedures, and cultural/social forces external to the organization, including an introduction and a final integration of the many ways in which organizations can contribute to positive employee health and well-being. This book is aimed at both academicians and practitioners who are interested in how interventions that stem from industrial and organizational psychology may address ethical dilemmas commonly faced by employees.

results are analyzed and discussed in this thesis Its main hypothesis was that a static type system speeds up the time developers need to solve programming tasks in an undocumented API The main results of the experiment speak strongly in favor of this hypothesis because the static type system seems to have a significantly positive impact on the development time
