Siracusa,Kevin Noguchi,2015-03-06 Building on the emerging field of biopolitics of security this research monograph demonstrates that political speech can be crafted to manipulate segments of the voting population who are inherently predisposed to being receptive to certain language The authors who come from both political science and behavioral neuroscience examine how the human brain reacts to expressions of political ideology regarding terrorism They apply these reactions to specific forms of political communication many of which are designed to elicit a desired response in creating support for a policymaker s agenda By comparing and contrasting a variety of case studies they demonstrate how similar acts accompanied by starkly different political language can create cognitive dissonance in the minds of the electorate and influence policy choices Each chapter analyzes the content of a speech its assimilation by different political groups and two case studies For example the case of Luis Posada Carriles a Cuban exile and former CIA agent responsible for the bombing of a Cuban airliner in 1976 is examined alongside that of Mohamed El Megrabi the Libyan intelligence officer convicted of the bombing of Flight 103 over Lockerbie Scotland in 1988 This unique study uses new research in neuropsychology to demonstrate how the American public s response to various policies on terrorism is manipulated highlighting the impact of ideological speech regarding terrorism the language of terror Forthcoming Books Rose Army,1996-06 **Medical and Health Care Books and Serials in Print** ,1997 Seeds of Victory Richard Denis Johnson,1997 Psychological Warfare is by no means a new concept in warfare To the layman however this particular aspect of armed conflict has seldom been greeted with understanding or even acknowledgment Accordingly not enough has been broadly or factually disseminated upon the subject to date Seeds of Victory explores in detail the component mechanics of an

intensely orchestrated Psychological Warfare campaign while utilizing the most recent formant of the Persian Gulf War as a case in point for understanding The tremendous scale of the Persian Gulf War s Psychological Warfare campaign is evidenced by the fact that long before Coalition soldiers fired the first shots in that conflict a different class of army had already been assembled for months and was fiercely locked in a pitched battle for dominance over Saddam Hussein s citizens and soldiers alike Far away from blaring headlines and flashy newscasts violent graphic images of warfare civil unrest starvation disease and death were systematically bombarding Saddam Hussein s Empire in wave upon wave of leaflet and radio assaults That provocative campaign of psychological attrition and dominance is documented within this text through personal interviews with some of the commanders and soldiers who orchestrated and executed that campaign Their experiences will accompany the reader from the earliest planning and developmental stages through the production and into the final dissemination phases of demoralization As a reference source this text is of historical significance as it documents in exacting detail the many deceptive Psychological Warfare campaign methodologies and strategies which incited wide spread desertions and mutiny among as many as 150 000 front line Iraqi combat troops many of whom were battle hardened veterans of the fierce eight year war with Iran Seeds of Victory is also unique in that it has already demonstrated its value within the professional realm of the Psychological Warfare community since its having been officially adapted by the United States Army s Psychological Warfare Group Command as an instructional and reference work for use within their company level units

more to protect itself against Psywar attacks and to use it effectively to enhance its own security in the present day multi threat scenario This is an attempt to table a calling attention motion before the nation
