**Comparative Administrative Law and Public Administration** Anthony M. Bertelli,2019 The purpose of this chapter is to explore critically and systematically contemporary public administration scholarship as it pertains to national administrative law To be clear from the outset our aim is not to examine legal scholarship about public administration but rather to understand how contemporary public administration scholarship thinks about administrative law The studies we review which we call bureau centric following Bertelli 2005 135 focus on the interaction of government agencies with politicians as well as with organized e g business interests and unorganized constituencies e g social welfare benefit claimants We conducted a systematic literature review to assess the current distribution of this bureau centric literature in leading international public administration outlets learning four things from the exercise First from the

perspective of bureau centric studies the role of administrative law is to constrain particularistic behavior of administrative officials as they interact with organized constituencies though the literature takes opposing views on the effectiveness of the law in doing this Second these studies tend to view the role of administrative law as shifting toward the promotion of a kind of pluralism as administrative officials interact with unorganized constituencies Third while the bureau centric literature is robust within the confines of particular national administrative law systems comparative studies are entirely absent from the important outlets we surveyed Fourth the American case dominates the literature in leading international public administration outlets which did not reveal any study that compares for instance how administrative law differs in its bureau centric implications across civilian and common law systems We consider this a missed opportunity and offer an agenda for future research that might begin to remedy this situation Public Management and the Rule of Law Julia

Beckett, 2015-05-18 Filled with practical tools and guidelines this book addresses an essential competence for public managers incorporating governance and law in public administration It links democratic constitutional values to administrative decision making and practices by stressing how public law authorizes informs and democratically constrains public servants in fulfilling public policies The author addresses important aspects of governance in chapters that discuss democratic values of the rule of law constitutional law legislation and policy administrative law judicial practice contract law and tort law The book also considers the practical aspects of public management such as tax collection benefits administration personnel administration and more with application guidelines and techniques based on thorough legal grounding
