Public and Private Agricultural Extension Dina Umali-Deininger, Lisa A. Schwartz, 1994-01-01 World Bank Discussion Paper 236 Agricultural support services play an important role in increasing agricultural productivity Given the importance of agriculture to developing countries governments have taken the lead in providing such services Concepts and Practices in Agricultural Extension in Developing Countries ,2008-01-01 **The World Bank Research Observer** ,2004

Knowledge Generation and Technical Change Steven Wolf, David Zilberman, 2012-12-06 Knowledge generation and transfer mechanisms are being transformed in important and controversial ways Investment in research and development has increased in response to recognition that scientific productivity is tightly connected to economic dynamism Patent protection has been expanded in order to stimulate higher levels of private investment Intellectual property rights held by public organizations and researchers are now increasingly transferred to private organizations to accelerate the diffusion and enhance the value of knowledge produced by public agencies and universities Additionally new institutions such as university offices of technology transfer venture capital markets and a variety of consortia in knowledge intensive industries are being established throughout the United States and in other parts of the world These changes have led to a repositioning of the state in systems of innovation and an increase in the proprietary character of technical information The purpose of this book is to review and analyze i contemporary transitions in agricultural knowledge generation and extension arrangements from an empirical perspective and ii emerging and contradictory perspectives as to how knowledge systems can be assessed effectively The authors aim to provide the reader with a better understanding of the implications of new biotechnologies and new intellectual property rights regimes on public private relations in science the extent to which benefits from scientific knowledge are being appropriated by private sector actors the diversity and possible outcomes of privatization initiatives in extension and prospects for public goods production and ecological sustainability given contemporary trends The book presents contrasting views on the degree of complementarity and substitution between private and public sector investments in research and extension Recognizing that the labels public and private are incomplete and at times misleading descriptions of the structure and function of coordinating bodies in social systems the analyses highlight ways in which public and private spaces and modes of functioning combine In addition to illustrating a broad range of analytic methodologies useful for studying organizational questions in knowledge systems the authors identify the implications of a range of past and potential institutional innovations *Handbook of Agricultural Economics* Robert E. Evenson, Prabhu Pingali, 2007-06-28 Volume 3 of this series of the Handbooks in Economics follows on from the previous two volumes by focusing on the fundamental concepts of agricultural economics The first part of the volume examines the developments in human resources and technology mastery The second part follows on by considering the processes and impact of invention and innovation in this field The effects of market forces are examined in the third part and the volume concludes by analysing the economics of our

changing natural resources including the past effects of climate change Overall this volume forms a comprehensive and accessible survey of the field of agricultural economics and is recommended reading for anyone with an interest either academic or professional in this area Part of the renown Handbooks in Economics series Contributors are leaders of their areas International in scope and comprehensive in coverage The State of Food and Agriculture 1996 Food and Agriculture Organization of the United Nations,1996 *Government Reports Announcements & Index* ,1996-02
