Ev Charger Top:

Advanced Concepts and Technologies for Electric Vehicles Akshay Kumar Rathore, Arun Kumar Verma, 2023-08-30

This book explains the basic and advanced technology behind the Power Electronics Converters for EV charging and their significant developments and introduces the Grid Impact issues that underpin the grid integration of electric vehicles. *Advanced Concepts and Technologies for Electric Vehicles* reviews state of the art and new configurations and concepts of more electric vehicles and EV charging mitigating the impact of EV charging on the power grid and technical considerations of EV charging infrastructures. The book considers the environmental benefits and advantages of electric vehicles and their component devices. It includes case studies of different power electronic converters used for charging EVs. It offers a review of PFC based AC chargers, WBG based chargers and Wireless chargers. The authors also explore multistage charging systems and their possible implementations. The book also examines the challenges and opportunities posed by the progressive integration of electric drive vehicles on the power grid and reported solutions for their mitigation. The book is intended for professionals, researchers and engineers in the electric vehicle industry as well as advanced students in electrical engineering who benefit from this comprehensive coverage of electric vehicle technology. Readers can get an in depth insight into the technology deployment in EV transportation and utilize that knowledge to develop novel ideas in the EV area.

Electric Vehicle Technology Dr. R. A. Kapgate, Amit Joshi, Dr. Pradeep Ammasaikutti, Dr. I. D. Soubache, 2025-09-27

Electric Vehicle EV Technology focuses on the design, development and operation of vehicles powered primarily by electric energy instead of conventional fossil fuels. It integrates knowledge from electrical engineering, power electronics, battery technology and control systems to enable efficient, sustainable and environmentally friendly transportation. The subject covers key areas such as battery management systems, electric motors, charging infrastructure, regenerative braking and vehicle to grid V2G technologies. It also explores trends in energy storage, renewable energy integration and the environmental impact of EV adoption. EV technology plays a critical role in reducing carbon emissions and advancing the future of sustainable mobility.

Electric Vehicle Technologies: Trends, Control, and Charging Solutions Nitesh Tiwari, Shekhar Yadav, Sabha Raj Arya, 2025-09-04. *Electric Vehicle Technologies: Trends, Control, and Charging Solutions* explores the latest innovations transforming electric transportation. This concise and accessible volume presents advances in electric vehicle EV systems focusing on solar energy integration, intelligent motor control, battery charging technologies and IoT based applications. The book is divided into three thematic sections. It begins with solar powered charging systems and hardware design for sustainable mobility. It then covers power electronics and motor control methods including BLDC control and adaptive charging frameworks. The final section addresses cutting edge developments like vehicle to grid V2G systems and IoT enabled EV automation. Key Features: Advances in solar EV charging and wireless power transfer. Control strategies for EV motors and battery charging. Integration of IoT and autonomous systems in EVs. Hardware designs for electric bicycles.

Development and Implementation of an E-Vehicle Allocation Optimized System for Corporate Usage, 2019-03-20 Master s Thesis from the year 2018 in the subject Engineering Automotive Engineering Technical University of Munich language English abstract This thesis is an initial approach to analyze the design and implementation of an e vehicle sharing system in the P3 Group o ce in Paris An overview of the electric vehicle charging infrastructure along with the relevant aspects of charging modes is provided A showcase of the analysis of di erent car sharing models within Europe is given after which a specific case study is analyzed in greater detail The parameters and features for the system were derived from a competitive benchmark of the car sharing models on the market today The objective was to assist the company in planning and managing a corporate e vehicle sharing system in a profitable way while o ering the employees good quality service Therefore the cost of designing and installing the P3 EV charging station was evaluated On this matter empirical data was gathered from P3 employees to better understand their daily commute their needs and their expectations of the system An optimization model for distances cost and charging patterns was discussed and formalized as an integer linear program in MATLAB Given the complexity inherent to this optimization model stochastic distribution was employed to minimize the cost for the company taking into consideration the trips paid and the costs involved namely the personal wage of an employee A focus on the optimal design of an e vehicle sharing system was necessary while considering the problem s dimensionality number of vehicles parking places battery capacities etc and employee relocation time This study determines if the system provides higher net benefits to the company than available transportation alternatives As a result of this pricing comparison a significant reduction in total cost could be achieved for the company The data set conclusively supports the implementation of the e vehicle sharing system which provides a decreased cost versus the use of public transportation A possible avenue of future research is to extend the functionality of the developed model by adding a responsive user demand and possibly maximizing the car sharing ridership between employees **Smart Energy for Smart Transport** Eftihia G.
