The Age of Empathy Frans de Waal, 2009-09-22 In this thought provoking book the acclaimed author of *Our Inner Ape* examines how empathy comes naturally to a great variety of animals including humans Are we our brothers keepers Do we have an instinct for compassion Or are we as is often assumed only on earth to serve our own survival and interests By studying social

behaviors in animals such as bonding the herd instinct the forming of trusting alliances expressions of consolation and conflict resolution Frans de Waal demonstrates that animals and humans are preprogrammed to reach out He has found that chimpanzees care for mates that are wounded by leopards elephants offer reassuring rumbles to youngsters in distress and dolphins support sick companions near the water's surface to prevent them from drowning From day one humans have innate sensitivities to faces bodies and voices we've been designed to feel for one another De Waal's theory runs counter to the assumption that humans are inherently selfish which can be seen in the fields of politics law and finance But he cites the public's outrage at the U S government's lack of empathy in the wake of Hurricane Katrina as a significant shift in perspective one that helped Barack Obama become elected and ushered in what perhaps could become an Age of Empathy Through a better understanding of empathy's survival value in evolution de Waal suggests we can work together toward a more just society based on a more generous and accurate view of human nature Written in layman's prose with a wealth of anecdotes wry humor and incisive intelligence *The Age of Empathy* is essential reading for our embattled times An important and timely message about the biological roots of human kindness Desmond Morris author of *The Naked Ape*
