The low carbon transition is ongoing everywhere. This Handbook, written by a group of senior and junior scholars from six continents and nineteen countries, explores the legal pathways of decarbonisation in the energy sector. What emerges is a composite picture. There are many roadblocks but also a lot of legal innovation. The volume distils the legal knowledge which should help move forward the transition. Questions addressed include the differences between the decarbonization strategies of developed and developing countries, the pace of the transition, the management of multi-level governance systems, the pros and cons of different policy instruments, the planning of low carbon infrastructures, the roles and meanings of energy justice. The Handbook can be drawn upon by legal scholars to compare decarbonisation pathways in several jurisdictions. Non-legal scholars can find information to be included in transition theories and decarbonization scenarios. Policymakers can discover contextual factors that should be taken into account when deciding how to support the transition. **EVS.9**, 1988.

Congressional Record United States. Congress, 1999. **Corporation tax in Northern Ireland** Great Britain: Parliament: House of Commons: Northern Ireland Affairs Committee, 2011-06-09. The committee supports the principle of devolving to the Northern Ireland Executive the decision over whether or not to amend the rate of corporation tax and believes this would assist the indigenous private sector to expand, innovate and employ more staff. The report uses 12.5% as a benchmark for the lower rate of corporation tax but suggests that on the basis that the decision is devolved to the Northern Ireland executive, it may in due course choose a lower rate. To maximise the benefits of a lower rate, though continued progress needs to be made on other economic development policy mechanisms including planning, education and incentives for research and development and exporting. Low corporation tax is not a panacea for all Northern Ireland's economic ills, warns the committee, and there are considerable implementation issues. Direct comparisons with the Republic of Ireland and its experience with 12.5% are difficult because the UK and Irish tax systems are different and the UK Government would have to satisfy the criteria laid down in the Azores judgment for the tax reduction to satisfy EU rules on state aids. The committee was surprised to discover HM Treasury do not know how much corporation tax is raised in Northern Ireland. It is

important that the Northern Ireland Executive has as much information as possible before deciding if and how it wishes to lower the rate and at least a better idea of the amount of financial risk they are taking on Furthermore the benefits of lowering corporation tax must not be outweighed by the costs to businesses and HMRC     *Electrical Review and Western Electrician with which is Consolidated Electrocraft* ,1916     **The Oxford English Dictionary** ,1989     **California County** ,1993     **New York Review of the Telegraph and Telephone and Electrical Journal** ,1919     **Weekly Northwestern Miller** ,1899     *Public Hearing Before Senate Environment and Energy Committee* New Jersey.
