G.,2019-08-30 Technology and particularly the Internet have caused many changes in the realm of politics Aspects of engineering computer science mathematics or natural science can be applied to politics Politicians and candidates use their own websites and social network profiles to get their message out Revolutions in many countries in the Middle East and North Africa have started in large part due to social networking websites such as Facebook and Twitter Social networking has also played a role in protests and riots in numerous countries The mainstream media no longer has a monopoly on political commentary as anybody can set up a blog or post a video online Now political activists can network together online The Handbook of Research on Politics in the Computer Age is a pivotal reference source that serves to increase the understanding of methods for politics in the computer age the effectiveness of these methods and tools for analyzing these methods The book includes research chapters on different aspects of politics with information technology engineering computer science or math from 27 researchers at 20 universities and research organizations in Belgium Brazil Cape Verde Egypt Finland France Hungary Italy Mexico Nigeria Norway Portugal and the United States of America Highlighting topics such as online campaigning and fake news the prospective audience includes but is not limited to researchers political and public policy analysts political scientists engineers computer scientists political campaign managers and staff politicians and their staff political operatives professors students and individuals working in the fields of politics e politics e government new media and communication studies and Internet marketing

Ethical Wisdom Mark Matousek,2011-05-24 From a bestselling author a riveting fun and insightful tour of life s meaning and purpose essential reading for anyone drawn to the query How ought we to live Daniel Goleman author of Emotional Intelligence Contrary to what we ve been taught in our reason obsessed culture argues Matousek emotions are the bedrock of ethical life without them human beings cannot be empathic moral or good But how do we make the judgment call between self interest and caring for others What does being good really mean Which parts of morality are biological which ethical When should instinct be trusted and when does it lead us into trouble How can we know ourselves to be good amidst the hypocrisy fears and sabotaging appetites that pervade our two sided natures Drawing on the latest scientific research and interviews with social scientists spiritual leaders ex cons altruists and philosophers Matousek examines morality from all angles in this thoroughly entertaining and helpful guide to crossing one s own murky moral terrain

Virus of the Mind Richard Brodie,2011-02-15 Virus of the Mind is the first popular book devoted to the science of memetics a controversial new field that transcends psychology biology anthropology and cognitive science Memetics is the science of memes the invisible but very real DNA of human society In Virus of the Mind Richard Brodie carefully builds on the work of scientists Richard Dawkins Douglas Hofstadter Daniel Dennett and others who have become fascinated with memes and their potential impact on our lives But Richard goes beyond science and dives into the meat of the issue is the emergence of this new science going

to have an impact on our lives like the emergence of atomic physics did in the Cold War He would say the impact will be at least as great While atomic bombs affect everybody's life viruses of the mind touch lives in a more personal and more pernicious way Mind viruses have already infected governments educational systems and inner cities leading to some of the most pervasive and troublesome problems of society today youth gangs the welfare cycle the deterioration of the public schools and ever growing government bureaucracy Viruses of the mind are not a future worry they are here with us now and are evolving to become better and better at their job of infecting us The recent explosion of mass media and the information superhighway has made the earth a prime breeding ground for viruses of the mind Will there be a mental plague Will only some of us survive with our free will intact Richard Brodie weaves together science ethics and current events as he raises these and other very disturbing questions about memes
