The Future of Unions and Worker Representation Anthony Forsyth, 2022-01-13 This book charts the path to revitalisation for trade unions in Australia the USA the UK and Italy It examines the examples of innovation and digital campaigning that are enabling unions to build new forms of worker power and overcome decades of declining membership wrought by neoliberalism globalisation and hostility from employers and the state The study evaluates the responses of unions in each country to falling membership levels since the 1980s It considers the US organising model and its adoption in Australia and the UK comparing this with the strategies of Italian unions which have been more deliberately focused on precarious and migrant workers The increasing reliance of US unions on community alliances as seen in the Fight for 15 and similar campaigns is scrutinised along with new union prototypes like Hospo Voice in Australia the Independent Workers Union of Great Britain and SI Cobas in Italy The book includes an in depth analysis of union responses to the gig economy in the four countries and the emergence of self organised worker collectives to combat this exploitative business model The vital role played by unions in defending the interests of workers during the COVID 19 pandemic is also examined As well as highlighting the most successful union initiatives to meet the challenges of the past 30 years the book assesses the strengths and deficiencies of the legal framework for union representation in the four nations It identifies the labour law reforms needed to rebuild collectivism but argues that more is needed than favourable laws This cross national study provides a rich basis for identifying the combination of reforms strategies and linkages required to ensure that unions can remain relevant for a new generation of digitally active workers

Urban Platforms and the Future City Mike Hodson, Julia Kasmire, Andrew McMeekin, John G. Stehlin, Kevin Ward, 2020-11-30 This title takes the broadest possible scope to interrogate the emergence of platform urbanism examining how it transforms urban infrastructure governance knowledge production and everyday life and brings together leading scholars and early career researchers from across five continents and multiple disciplines The volume advances theoretical debates at the leading edge of the intersection between urbanism governance and the digital economy by drawing on a range of empirically detailed cases from which to theorize the multiplicity of forms that platform urbanism takes It draws international comparisons between urban platforms across sites with attention to the leading edges of theory and practice and explores the potential for a renewal of civic life engagement and participatory governance through platform cooperativism and related movements A breadth of tangible and diverse examples of platform urbanism provides critical insights to scholars examining the interface of digital technologies and urban infrastructure urban governance urban knowledge production and everyday urban life The book will be invaluable on a range of undergraduate and postgraduate courses as well as for academics and researchers in these fields including anthropology geography innovation studies politics public policy science and technology studies sociology sustainable development urban planning and urban studies It will also appeal to an engaged academia adjacent readership including city and regional planners policymakers and third sector

researchers in the realms of citizen engagement industrial strategy regeneration sustainable development and transport

The Fight Against Platform Capitalism Jamie Woodcock, 2021-03-02 So far platform work has been an important laboratory for capital Management techniques like the use of algorithms are being tested with a view to exporting across the global economy and it is argued that automation is undermining workers agency Although the contractual trick of self employment has allowed platforms to grow quickly and keep their costs down yet it has also been the case also that workers have also found they can strike without following the existing regulations This book develops a critique of platforms and platform capitalism from the perspective of workers and contributes to the ongoing debates about the future of work and worker organising It presents an alternative portrait returning to a focus on workers experience focusing on solidarity drawing out a global picture of new forms of agency In particular the book focuses on three dynamics that are driving struggles in the platform economy the increasing connections between workers who are no longer isolated the lack of communication and negotiation from platforms leading to escalating worker action around shared issues and the internationalisation of platforms which has laid the basis for new transnational solidarity Focusing on transport and courier workers online workers and freelancers author Jamie Woodcock concludes by considering how workers build power in different situations Rather than undermining worker agency platforms have instead provided the technical basis for the emergence of new global struggles against capitalism
