Black Friday Early Deals Today Same Day Delivery:

Being Modern in China Paul Willis, 2019-11-13 This book analyses modernity and tradition in China today and how they combine in striking ways in the Chinese school Paul Willis the leading ethnographer and author of *Learning to Labour* shows how China has undergone an internal migration not only of masses of workers but also of a mental and ideological kind to new cultural landscapes of meaning which include worship of the glorified city devotion to consumerism and fixation upon the smartphone and the internet Massive educational expansion has been a precondition for explosive economic growth and technical development but at the same time the school provides a cultural stage for personal and collective experience In its closed walls and the inescapability of its scores an astonishing drama plays out between the new and the old with a tapestry of intricate human meanings woven of small tragedies and triumphs secret promises and felt betrayals helping to produce not only exam results but cultural orientations and occupational destinies By exploring the cultural dimension of everyday experience as it is lived out in the school this book sheds new light on the enormous transformations that have swept through China and created the kind of society that it is today a society that is obsessed with the future and at the same time structured by and in continuous dialogue with its past

Congress, 1970 **The London Corn Circular** ,1898 **The Stock Market** George Leland Leffler, 1951 This is a study of the stock market as it operates and functions today It is written for the serious observer and student of the market whether he be an investor or trader a staff

member of a brokerage firm or a college student College instructors in courses in the stock market or the securities markets will find that the book is organized for use as a text for a one semester course Both practice and theory are combined in such a way as to find maximum usefulness for college teaching The college student will find in the book a complete description of the entire securities market Particular attention has been given to the economic functions performed by such markets and their place in the economic life of which we are a part The college student is shortly to become a business or professional man he will then become a potential investor or trader in stocks and bonds It is therefore of the highest practical importance that he know the essential relationships between customers and brokers and the way trading and investing in stocks are carried on He should know how the securities business operates if for no other reason than to avoid the pitfalls which ensnare so many unwary followers of the market The author attempted to cover in as exhaustive a manner as possible all aspects of the stock market Although highly technical operations of the market are included in the book the author at all times has sought to reduce them to clear non technical descriptions understandable to readers not directly employed in the securities business The Iron Age ,1925 *Air Line Pilot* ,1993
