The Future of Unions and Worker Representation

Anthony Forsyth, 2022-01-13. This book charts the path to revitalisation for trade unions in Australia, the USA, the UK and Italy. It examines the examples of innovation and digital campaigning that are enabling unions to build new forms of worker power and overcome decades of declining membership wrought by neoliberalism, globalisation and hostility from employers and the state. The study evaluates the responses of unions in each country to falling membership levels since the 1980s. It considers the US organising model and its adoption in Australia and the UK, comparing this with the strategies of Italian unions which have been more deliberately focused on precarious and migrant workers. The increasing reliance of US unions on community alliances, as seen in the Fight for 15 and similar campaigns, is scrutinised along with new union prototypes like Hospos Voice in Australia, the Independent Workers Union of Great Britain and SI Cobas in Italy. The book includes an in-depth analysis of union responses to the gig economy in the four countries and the emergence of self-organised worker collectives to combat this exploitative business model. The vital role played by unions in defending the interests of workers during the COVID-19 pandemic is also examined. As well as highlighting the most successful union initiatives to meet the challenges of the past 30 years, the book assesses the strengths and deficiencies of the legal framework for union representation in the four nations. It identifies the labour law reforms needed to rebuild collectivism but argues that more is needed than favourable laws. This cross-national study provides a rich basis for identifying the combination of reforms, strategies and linkages required to ensure that unions can remain relevant for a new generation of digitally active workers.

Sharing Economy Ming

Hu, 2019-01-11. This edited book examines the challenges and opportunities arising from today's sharing economy from an operations management perspective. Individual chapter authors present state-of-the-art research that examines the general impact of sharing economy on production and consumption, the intermediary role of a sharing platform, crowdsourcing, management and context-based operational problems. Sharing economy refers to a market model that enables and facilitates the sharing of access to goods and services. For example, Uber allows riders to share a car, Airbnb allows homeowners to share their extra rooms with renters, Groupon crowdsources demands enabling customers to share the benefit of discounted goods and services, whereas Kickstarter crowdsources funds enabling backers to fund a project jointly. Unlike the classic supply chain settings in which a firm makes inventory and supply decisions, in sharing economy supply is crowdsourced and

can be modulated by a platform The matching supply with demand process in a sharing economy requires novel perspectives and tools to address challenges and identify opportunities The book is comprised of 20 chapters that are divided into four parts The first part explores the general impact of sharing economy on the production consumption and society The second part explores the intermediary role of a sharing platform that matches crowdsourced supply with demand The third part investigates the crowdsourcing management on a sharing platform and the fourth part is dedicated to context based operational problems of popular sharing economy applications While sharing economy is becoming omnipresence the operations management OM research community has begun to explore and examine different business models in the transportation healthcare financial accommodation and sourcing sectors This book presents a collection of the state of the art research work conducted by a group of world leading OM researchers in this area Not only does this book cover a wide range of business models arising from the sharing economy but it also showcases different modeling frameworks and research methods that cannot be missed Ultimately this book is a tour de force informative and insightful Christopher S Tang Distinguished Professor and Edward Carter Chair in Business Administration UCLA Anderson School of Management
