Imagination Anna-Teresa Tymieniecka,Patricia Trutty-Coohill,2016-02-03 The essays in this book respond to Anna Teresa Tymieniecka s recent call to explore the relationship between the evolution of the universe and the process of self individuation in the ontopoietic unfolding of life The essays approach the sensory manifold in a number of ways They show that theories of modern science become a strategy for the phenomenological study of works of art and vice versa Works of phenomenology and of the arts examine how individual spontaneity connects with the design s of the logos of the whole and of the particulars while the design s rest not on some human concept but on life itself Life s pliable matrices allow us to consider the expansiveness of contemporary science and to help create a contemporary phenomenological sense of cosmos
