Shaping American Democracy Scott M. Roulier,2017-12-06 This book argues that the design of built spaces influences civic attitudes including prospects for social equality and integration in America Key American architects and planners including Frederick Law Olmsted Frank Lloyd Wright Robert Moses and the New Urbanists not only articulated unique visions of democracy in their extensive writings but also instantiated those ideas in physical form Using criteria such as the formation of social capital support for human capabilities and environmental sustainability the book argues that the designs most closely associated with a communally inflected version of democracy such as Olmsted s public parks or various New Urbanist projects create conditions more favorable to human flourishing and more consistent with a democratic society than those that are individualistic in their orientation such as urban modernism or most suburban forms

Shaping American Military Capabilities after the Cold War Richard Lacquement,2003-02-28 For more than 40 years U S defense policy and the design of military capabilities were driven by the threat to national security posed by the Soviet Union and its allies As the Soviet Union collapsed analysts wondered what effect this dramatic change would have upon defense policy and the military capabilities designed to support it Strangely enough this development would ultimately have little effect on our defense policy Over a decade later American forces are a smaller but similar version of their Cold War predecessors The author argues that despite many suggestions for significant change the bureaucratic inertia of comfortable military elites has dominated the defense policy debate and preserved the status quo with only minor exceptions This inertia raises the danger that American military capabilities will be inadequate for future warfare in the information age In addition such legacy forces are inefficient and inappropriately designed for the demands of frequent and important antiterrorist and peace operations Lacquement offers extensive analysis concerning the defense policymaking process from 1989 to 2001 including in particular the 2001 Quadrennial Defense Review This important study also provides a set of targeted policy recommendations that can help solve the identified problems in preparing for future wars and in better training for peace operations

The Housing Crisis and Homelessness: How Economic and Social Factors Shape America's Housing Landscape Hans Collier,2025-04-03 The housing crisis and homelessness in America are complex issues that intertwine economic policies social dynamics and individual lives This book unravels these complexities providing a comprehensive examination of the factors that shape the nation s housing landscape Through detailed analysis and compelling narratives the book sheds light on the multifaceted nature of housing instability and its far reaching impacts The book begins by exploring the historical

context of housing in America tracing the evolution of policies and societal changes that have contributed to the current crisis It examines the role of urban development economic shifts and legislative actions in creating an environment where secure affordable housing has become increasingly elusive for many The narrative is enriched with real life stories and case studies that illustrate the human side of these systemic issues making the data and statistics relatable and deeply moving In the subsequent sections the book delves into the economic factors that exacerbate housing instability It scrutinizes the housing market mortgage practices and the impact of economic downturns on housing availability and affordability The book highlights how financial mechanisms and market trends contribute to the widening gap between those who can afford stable housing and those who cannot

The Shaping of America: Continental America, 1800-1967 Donald William Meinig,1986
