Law and Technology Nanci K. Carr, 2024-09-26 Technology is an important part of our everyday lives Whether we ask Alexa to start the coffee machine or check our phones for the traffic report we increasingly interact with technology As much as we may enjoy and rely upon technology it is not without its challenges including the inability of the law to keep pace with technological developments and the ethical issues that arise For example tort law is impacted by technology the proliferation of drones requires a new look at the law of trespass and video Zoom meetings can impose direct liability on employers for example Social media supports an increasing share of all advertising and endorsements and is subject to regulation of which influencers are often not aware Global advertising expenditures on various internet and social media platforms also drives the need for a change in right of publicity law In the United States the right of publicity is governed by state rather than federal law so there is no uniform approach One part of the book includes a survey of the law of each US state and proposes a new federal statute Although most of the examples are drawn from the US the issues raised are fully international in scope and relevance This book will appeal to legal practitioners trying to manage new technology issues facing their clients academics teaching students how the law is changing and needs to continue to change as technology develops and teachers and researchers in business and management schools needing to address technology and governance issues **Der Spiegel**

Drawing Lines Kira Davis, 2023-01-25 Kira Davis has built a brand on reaching out to the other side on giving people space to be wrong the space to discuss the space to tolerate I sincerely believe there are many reasonable people in America from all ideologies who are still willing to talk with each other people who are quite happy to live and let live Unfortunately none of those people are controlling the conversations right now Trump's presidency has burned away the niceties that tenuously held our political ecosystem together We've had a front row seat to the strategy of the Left We're seeing the lengths they will go to and the lies they let stand in service of crushing 50 percent of this nation The onslaught of dishonesty has been relentless The progressive left isn't happy to just let us live with our own values our own media our own cultural verticals They seek to completely destroy ideological and financial competition They seek unity through complete elimination of the other side There are times for compromise and times to draw a line in the sand and friends the latter has arrived It is

time to draw our lines as Christians and Conservatives The Chaos Machine Max Fisher,2022-09-06 The Chaos Machine is an essential book for our times Ezra Klein The Chaos Machine is the story of how the world was driven mad by social media The election of populists like Trump and Bolsonaro strife and genocide in countries like Myanmar the rampant spread of COVID 19 conspiracy theories as deadly as the pandemic itself all of these are products of a breakdown in our social and political lives a breakdown driven by the apps companies and algorithms that compete constantly for our attention Max Fisher is a leading New York Times technology reporter whose work has covered the way that social media sites driven increasingly by artificial intelligence rather than human ingenuity push users towards more and more extreme positions deepening the divisions in society in pursuit of greater engagement and profit With extraordinary access to the most powerful players in Silicon Valley and with testimonies from around the world of the havoc being wreaked by our online selves The Chaos Machine shows us how we got to this uniquely perilous moment and how we might get out of it **Higher**
