fraudulent activities Implement a robust system of warranty cost control Warranty fraud is a major cost control issue for most companies but the sensitive nature of the topic leaves most reluctant to share their experiences and divulge their strategies Warranty Fraud Management brings warranty fraud out into the open and provides a clear actionable framework for cost savings through fraud reduction *Limitation of Sales Warranties as an Alternative to Intellectual Property Rights* Marc Lane Roark, 2014 Apple's success with the Apple iPhone has brought with it certain problems Its success has revealed a community of hackers that have attempted to circumvent the exclusive arrangement that Apple shares with AT said differently the article weighs whether manufacturers can achieve their goals of preventing consumers from using their products in an unauthorized manner by removing warranty protections from the consumer The Article presents a behavioral model based on the Triandis model of planned behavior and enhances the model by accounting for likely and unlikely benefits and detriments The model suggests that participants weigh the detrimental impact together with the probability and magnitude of the detriment against the beneficial impact together with the probability and magnitude of the benefit when making the decision to engage in technological piracy Considering only half of the equation what deterrents are likely to impact consumer behavior the Article then reconciles the model to empirical evidence suggesting that Apple's warranty could be a stronger deterrent for consumers than civil liability The data collected suggests four observations of the survey pool 1 known sanctions reduce the preference for engaging in technology piracy 2 persons surveyed believe they are more likely to lose a warranty than face civil liability for engaging in technological piracy 3 a better warranty enhances the magnitude of the warranty's benefit and therefore raises the level of deterrence to nearly equal the deterrence level of civil liability and 4 the magnitude probability and deterrent impact of both deterrents can be enhanced if consumer knowledge is improved The article concludes that manufacturers can better protect their post sale investment in property by raising consumer awareness of their warranty's quality and by raising awareness of the consequences for using the product in a way that is outside the terms of the consumers authorized use Warranties and Refunds ,1996
