Experiment and Exploration: Forms of World-Disclosure Sönke Ahrens,2014-03-18 This book deals with contemporary epistemological questions connecting Educational Philosophy with the field of Science and Technology Studies It can be understood as a draft of a general theory of world disclosure which is in its core a distinction between two forms of world disclosure experiment and exploration These two forms have never been clearly distinguished before The focus lies on the experimental form of world disclosure which is described in detail and in contrast to the explorational form along the line of twenty one characteristics which are mainly derived from empirical studies of experimental work in the field of natural
