the Land-grant Colleges and Universities James Edward Pollard, 1964 **Poverty Reduction and Growth**, 2006-01-01

That raising income levels alleviates poverty and that economic growth can be more or less effective in doing so is well known and has received renewed attention in the search for pro poor growth What is less well explored is the reverse channel that poverty may in fact be part of the reason for a country's poor growth performance This more elaborated view of the development process opens the door to the existence of vicious circles in which low growth results in high poverty and

high poverty in turn results in low growth Poverty Reduction and Growth is about the existence of these vicious circles in Latin America and the Caribbean about the ways and means to convert them into virtuous circles in which poverty reduction and high growth reinforce each other Through its analysis of fresh data and the attention it pays to issues such as the persistent inequality in the region the role played by various microdeterminants of income and the potential existence of human capital underinvestment traps this title should be a valuable contribution to the current regional debate on poverty and growth a debate that is critical to the design of policies conducive to enhancing welfare in all its dimensions among the poor of Latin America and the Caribbean *Education and the Economics of Human Capital* Ronald A. Wykstra,1971

Compilation of writings on the economic implications of expenditure on education as a form of investment in human resources development human capital with particular reference to the USA includes papers on various economic theories concerning the relationship between economic growth and national budget for education and covers cost benefit analysis considerations the adjustment of educational structure to the requirements of economic development etc Bibliography pp 266 to 268 references and statistical tables Accounts and Papers of the House of Commons Great Britain.
